Be it enacted by the Legislature of the State of Texas:

SECTION 1. That Articles 3886 and 3887, Chapter 5, of Title 86, of the Revised Civil Statutes of the State of Texas be so amended as that same shall hereafter read as follows:

The near approach of the end of the session and the crowded condition of the calendar of both houses of the Legislature, and the improbability that this bill can be reached in its order on three several days in each house, and the great need and demand for the passage of this act, creates an emergency and an imperative public necessity exists for the suspension of the constitutional rule requiring bills to be read on three several days in each house, and said rule is so suspended.

PRAIRIE VIEW STATE NORMAL AND INDUSTRIAL COLLEGE.

OBJECT OF THE SCHOOL.

Prairie View State Normal and Industrial College has for its object the training of persons desiring to fit themselves for the important profession of teaching, by giving them thorough instruction and practical drill in the best recognized methods of organizing, disciplining, and conducting schools.

The particular aims are to fit colored youths for responsible positions in the colored public schools of Texas, to impart something of the scholarly spirit indispensable to excellence in teaching, and to awaken an enthusiasm for the education and for the industrial and moral improvement of the colored race in Texas.

Believing in the value of industrial training in connection with the literary and professional studies, as a means to mental, moral and economic improvement, the Board of Directors have added Agricultural and Mechanical Departments and a department of Female Industries to give a well rounded education and to prepare the students for practical life.

ORGANIZATION AND GOVERNMENT.

The Prairie View State Normal and Industrial College of Texas is a branch of the Agricultural and Mechanical College of Texas at College Station, and is under the control of the Board of Directors and President of that College. The Board of Directors elect a Principal and a Faculty, to whom are entrusted the affairs of the Institution.

It is the duty of the Principal to exercise immediate supervision and direction, subject to the regulations and restrictions imposed by the Board of Directors.

The instruction of the Institution is committed to departments. These departments are, at present, as follows: Science, Mathematics, English, Pedagogy and History, Mechanical, Agricultural, Sewing and Millinery and Cooking.

Such assistant teachers are employed as are needed to carry out the work of the departments.

The discipline, as well as instruction of all the students of the Institution is committed to the Faculty, the Principal being held responsible for the enforcement of regulations and the maintenance of discipline, with the privilege of calling in, at any time, the assistance of any or all of the Faculty.

The immediate supervision of the young ladies of the Institution is

entrusted to a Preceptress, whose duty it is to see that the conduct of the young women, their personal habits, manners, carriage, modes of dress, and habits of study conform to correct standards.

Instruction is given by means of practice in the shops, by lectures, and by text-books.

The work in carpentry and blacksmithing is arranged in graded series, beginning with the simple joints and leading to the more difficult ones. The students are taught how to care for hand tools, machine tools, and how to sharpen edge tools. Some general repairing is done, which gives them more practical ideas.

By combination of the courses the students in the short course are given such knowledge as will enable them to become good carpenters, blacksmiths, and stationary engineers. Drawing is taught throughout the course. The courses are as follows:

The object of the *short course* in Mechanics is to train students in the use of tools and to lay a broad foundation for those who wish to become tradesmen. With this end in view the course has been carefully selected and arranged. Our purpose is not only to make men workmen but to make workmen men. Special students in this short course in Mechanic Arts are required to take all subjects in literary course except special work in Teacher's Course.

DEPARTMENT OF SCIENCE.

J. H. CRAWFORD.

P. E. BLEDSOE.

This department renders service to the Normal, Agricultural and Mechanical Departments of the school and gives instruction in the following subjects: Physical Geography, Physiology, Physics, Zoology, Chemistry, Botany, and Geology.

I. *Physical Geography*.—First-Year Class; Fall and Winter Terms, four hours a week.—In this subject the relation between the physical features and the plant and animal life of a locality are kept continually in mind. These topics are given special attention:

1. The earth as a whole: Shape, size; motions of the earth and their effects; latitude, longitude and time.
2. The land: Erosive agents of the soil; plains and plateaus; mountains and volcanoes.
3. The atmosphere: Composition, motion and storms.
4. The sea: Depth and temperature; tides and currents.

Text: Maury.

II. *Physiology*.—First-Year Class; Spring Term, four hours a week.

—Under this subject is given a general study of the structure, functions, and care of the human body. Liberal use is made of the human skeleton, models of head, eye, ear, mouth and a section of skin. Special attention is given to hygiene, the organs of respiration, circulation and digestion and the effects of alcoholic beverages and narcotics upon the system. Drawings of tissues, bones and organs showing relative positions are required.

Text: Coleman.

III. *Elementary Physics*.—Second-Year Class; Fall and Winter Terms, four hours a week.—In this course, matter, mechanics, sound, heat, radiant energy, magnetism and electricity are studied and experiments made illustrative of the underlying principles.

Text: Avery's "First Lessons in Science."

IV. *Advanced Physics*.—Senior Class; Fall and Winter Terms, four hours a week.—The laboratory work in this course is largely quantitative. Students are required to make experiments and to solve and form problems illustrative of the same.

1. Theory: Divisions, properties and conditions of matter; motions, force, work and energy; gravitation and gravity; uniform and accelerated velocity; pendulum; simple machines; mechanics of solids, liquids and gases; heat; light; electricity, sound.

2. Laboratory: Careful measurements of lengths, areas, volumes and masses; problems in the mechanics of solids, liquids and gases; study of simple machines; problems in heat, light and sound.

Text: Gage.

V. *Inorganic Chemistry*.—Third-Year Class; Fall and Winter Terms, four hours a week.—The aim of this course is to give the student a knowledge of the chemical properties of the common elements and their compounds and to undertake as much qualitative and quantitative work as may be necessary to illustrate the law of Avogadro and the laws of the definite and multiple proportions. Over one hundred experiments are performed and the results and inferences are recorded in note books. Considerable attention to the practical side of the subject and the composition and manufacture of soap, glass, alloys, fertilizers, etc., are discussed freely and fully.

Text: Williams.

VI. *Zoology*.—Second-Year Class; Spring Term, four hours a week.—This course is elementary; however, considerable attention is paid to the relationship of the different classes of animals and their adaptation to their environment. The life history of some animals is traced, noting the transformations through which they pass in coming to maturity. The student is taught the use of the microscope and a number of lantern slides are used.

Text: Steele.

VII. *Botany*.—Third-Year Class; Spring Term, four hours a week.—The plant is studied as a living body possessed of organs with functions similar to those of animals. The life relations are observed in the laboratory by tracing its development from the seed and studying the functions of root, stem, leaf and flower. Such plants are selected for laboratory study as will best exemplify the phase of the life condition

under consideration. A herbarium of the local flora is prepared by each student and some analytical work of at least twenty specimens.

Text: Bergen.

VIII. *Geology*.—Senior Class; Spring Term, four hours a week.—This subject is treated under three divisions:

1. Structural and Dynamical Geology, which gives an account of the origin and nature of the earth's crust; its movements, producing mountains, table lands and valleys, with attendant phenomena of earthquakes, volcanoes, etc., also erosion, transportation and deposit by wind, water and ice.

2. Historic Geology, which treats of the organic life of the various geological periods.

3. Economic Geology, which treats of the soil and climate of a locality and its adaptation to the wants of man.

MRS. T. M. HUNT,

Preceptress, in Charge of Girls' Dormitories.

DISCIPLINE.

We strive to use such discipline as will develop a *high type of womanhood*. Girls are encouraged to do right from *principle*. They are placed on their honor, and *conduct becoming ladies* is insisted upon.

The Preceptress lives with the female pupils and is present to advise and direct them.

Since we believe a knowledge of the details of household economy is essential to the education of every woman, each female pupil is required to spend some time every day in caring for the dormitories.

The *health* of the girls is a subject of constant care, and pupils are taught under direction to care for the ill.

Plainness and *economy in dress* are encouraged by precept and example.

Cleanliness of person, apparel, rooms and premises is the rule.

WHAT TO BRING.—Two blankets, or quilts; three sheets, each two and three-fourths or three yards long; three pillow cases; one white bed-spread; four towels; four table napkins; two yards unbleached domestic for clothes bag; one pair rubber overshoes; one mackintosh rain cloak; one umbrella.

DORMITORIES.

The female pupils are housed in two buildings: one, a three-story brick building of 36 rooms and nine hallways, with a commodious front gallery looking south and extending the entire length of the building; the other a comfortable two-story frame building.

Both buildings are well lighted and ventilated. The rooms are heated by box stoves and there is no extra charge for fuel.

These two buildings afford good accommodations for one hundred and fifty girls.

The class-work in Sewing, Millinery and Cooking is carried on in the Girls' Industrial Building.

In the brick buildings are located the office of the Preceptress, the girls' reading room and the girls' reception room.

YOUNG MEN'S DEPARTMENT.

R. L. ISAACS, Monitor.

DISCIPLINE.

The aim of this department is to teach the male pupils self-respect, self-control and regard for the rights, feelings, and property of others.

The boys are required to keep their rooms neat and clean.

Cleanliness of person, apparel, rooms, and premises is insisted upon.

A special aim is to inculcate a sense of honor; a regard for truthfulness and honesty; and appreciation of duty and personal responsibility, and habits of application and industry.

DORMITORIES.

Foster Hall is a three-story brick building containing 29 rooms and three halls. The second floor of the Kirby Hall contains 10 rooms; the Pickett Hall 16 rooms. These buildings afford fair accommodations for 150 boys.

THE DINING HALL.

H. C. ALDRIDGE, Steward.

N. A. BANKS, Director of Mess Hall.

The pupils and some of the teachers take meals in the school dining hall, which is large, airy, well lighted and comfortable.

The tables are served at meal times by young men students, who in this way earn a portion of their school expenses.

A high standard of social conduct is aimed at. Pupils are constrained to cultivate a quiet, genteel, refined demeanor. Boisterousness is discouraged, and anything tending toward familiarity or vulgarity in conduct or conversation meets with sharp disapproval.

The director is in charge of the pupils in the dining room.

The corps of boy waiters have the duty of serving the meals, waiting at tables, and clearing tables, cleaning dishes and setting up tables for the succeeding meal.

The diet is plain and healthful, with considerable variety both of material and preparation. On holidays a special dinner is served.

THE SCHOOL LAUNDRY.

W. P. TERRELL, Superintendent.

A. D. EWELL, Foreman.

MRS. R. L. EWELL, Assistant.

The laundry is supplied with steam and equipped with suitable machinery.

There are two large cylindrical washers, one extractor or rotary wringer, clothes starcher, collar and cuff ironer and mangle.

The entire washing, ironing and sorting of the clothes for all the pupils is done in the steam laundry by the girl pupils, assisted by three boys and directed by a foreman.

Pupils thus have the opportunity of learning a useful calling, while doing their own laundering.

GENERAL INFORMATION.

SITUATION AND SURROUNDINGS.

The Prairie View State Normal and Industrial College is located in Southeast Texas, in Waller county, six miles east of Hempstead. The situation is commanding and beautiful. The buildings face a broad prairie on the south, which runs for miles to the southeast. To the west and north lie extensive tracts of timber. Five miles southeast is the growing little town of Waller. The Houston & Texas Central Railway runs in front of the school, a mile distant, making the college easy of access by rail from all parts of the State.

A constant Gulf breeze, which often becomes a strong wind, insures a pure and healthful atmosphere, and the general health of the pupils has been good.

HOW TO REACH PRAIRIE VIEW.

Several days before leaving home, students should inform their nearest railroad ticket agent that Prairie View Station is in Waller county, on the main line of the Houston & Texas Central Railroad, and find out from him the best route to reach it. Find out also on what day and on what train you will arrive, and notify the Principal of the school of your coming.

OPENING DAY.

The twenty-ninth annual session opens Wednesday, September 2, 1908, and every student, if possible, should reach the College on the opening day.

MESS HALL.

All student boarders and all unmarried teachers take their meals at this building in the large dining hall. The aim of the State is to furnish a palatable, healthful diet at actual cost of material and service.

YOUNG WOMEN'S DORMITORIES.

The girls of the institution are housed in three dormitory buildings: one, a two-story frame building of 31 rooms; the second a three-story brick building of 36 rooms, and the third a three-story brick building of 28 rooms on second and third floors and containing on the first floor the Sewing and Cooking Departments. These three buildings are all lighted by electric lights and have water connection and baths with hot and cold water.

YOUNG MEN'S DORMITORIES.

The Kirby Building has been moved to the east part of the campus, and has undergone an extensive and thorough remodeling and repair, which has made this one of the most useful and tasteful buildings of the institution. The upper story contains ten bedrooms for senior boys; the lower, seven rooms, are used for the Chemical and Physical Laboratory and recitation rooms.

Pickett Hall is a frame building of sixteen rooms for the accommodation of young men.

The three-story brick dormitory, Foster Hall, was built in order to meet the growing demand for room. This building contains twenty-nine rooms, with good light, ventilation and furnish brick bath house contains shower baths for boys.

ACADEMIC HALL.

This hall is a stately building—the main central part is three stories in height and containing, above, the chapel, with a gallery below, the principal's office, book store, library and reading wings, each of two stories, contain six recitation rooms and committee rooms, used solely by the Board of Directors whenever the presence of the school requires their presence at the institution.

THE SHOP.

The shop of the Mechanical Department is a two-story structure, with an additional room of brick, containing the wood outfit, and additions containing the blacksmithing outfit, boiler, steam laundry, etc.

THE CAMPUS.

The school campus comprises at present fifty acres, in which buildings are appropriately situated. Fourteen teachers' cottages located around the campus. All the dormitories and school have light and water connections.

STATE STUDENTS.

Each of the State Senators and State Representatives has legislative enactment to the appointment of one State student to college. Every appointee must stand an entrance examination to Percentage, Orthography, English Grammar and Com Texas History and United States History, and any appointee to show a reasonable degree of proficiency in the above branches rejected and his place filled by the Senator or Representative in his stead. Every appointee must present, on entrance, satisfactory testimonials of good character. Such State students as show a decided aptitude in scholarship and aptitude for teaching are recommended by the Faculty for reappointment.

HONORS.

Students who complete the studies of the full course satisfactorily making required averages, will receive a normal diploma. Said diploma has by law the rank of a permanent teacher's certificate and is valid during good behavior.

First Grade Normal Certificates, valid for six years, and Second Grade Normal Certificates valid for three years in the public schools of Texas are issued to those who complete the required subjects and attain

desired standing in the work of the second and third years of the course.

work and deportment, students must show a commendable ability to teach before either certificate or diplomacy is granted. The right of a pupil to receive a diploma or a certificate shall be determined by the Faculty, in full meeting, according to the standard of scholarship, and the mode of recording the same, as have been regularly provided for.

LIBRARY AND READING ROOM.

The general library and reading room occupies a space on the first floor of Academic Hall. It contains about 2000 volumes of reference books, history, biography, poetry and general literature. Most of these books are selected with special reference to the tastes of students and young people—and are classified according to the latest methods. They are all catalogued on cards, and drawn by all pupils without cost. The reading room receives regularly some of the leading newspapers and periodicals, and is open seven hours on each week day, two hours on Monday and three hours on holidays. A reading room for girls with accommodations is located in their brick dormitory.

RELIGIOUS OBSERVANCES.

On Sunday morning at 9:30 a Sunday school is regularly held, followed by a review of the lesson by the superintendent. Two voluntary Christian societies are maintained by students, assisted by teachers, the W. C. A. for girls and the Young Men's Christian Association for young men. The Young Men's Christian Association is well organized and holds two meetings each week; one for Bible study outlined by the International Committee, and another where different religious and moral subjects are discussed. At 7 p. m. every Sabbath students assemble in the Chapel to hear a sermon or a religious lecture.

LITERARY SOCIETIES.

Present there are four literary societies organized and managed by students—The Excelsior, Wheatley, Douglass and Pansy. There are three for the young men and two for the young women. These are separate in work, time and place of meeting. Most of the work is done in private meetings. Each society is permitted to render a public address once during the session.

RHETORICALS.

On the fifth and sixth periods of every other Monday in the school year are given to rhetorical exercises. The whole student body is divided into groups and one group is assigned to a teacher. Two hours of the first Friday in each month of school are given to a public program composed of recitations, speeches and exercises rehearsed during the month and the pupils rendering them. The pupils are held accountable in the proficiency of this work, which has been given a relative weight in our system of grading.
