About Killers of the Dream

Lillian Smith's new book, Killers of the Dream, seems to have created quite a furore in the seeming tranquil minds of some of our book reviewers. More than cursory examination of its contents, however, will reveal little that is startling, revolutionary, nor could its context validly be construed to be exhortative. Miss Smith has merely reached that stage in her development where she is able to give voice to her belief in truth, and has, therefore, documented episodes which list irrefutable evidence of the fact that all men have souls. Once this fact has been established, to treat another human being with anything other than justice, and in a manner other than humanitarian is to commit a sin against the Creator who made human beings in His image.

More enlightening than the book itself, which has only 250 pages, is Miss Smith's foreword which covers a few lines more than 2 pages. In these few words may be found the basis for Miss Smith's beliefs, and for the development, within herself, of a philosophy of life which is purely humanitarian. Though it is to be doubted that she could have written such a book before the present stage of development in her thinking had been reached, its message is as good now as it might have been earlier. And in its incisiveness it cuts another finger-hold in which man may cling momentarily in his climb toward understanding and to God.
