February Is Black History Month

The annual observance of Black History Month in February will be highlighted at Prairie View A&M University and throughout the nation.

Several major events are scheduled on campus along with daily activities to be

sponsored by most university academic and student related departments. The History Department which coordinates the local observance, is again publishing a "Panther Cub" to describe most of the activities planned.

The first of major events is the Annual Ministers Conference which will focus on Black Leadership and the team work of the church and mostly black educational institutions.

Hundreds of Texas ministers

are expected for the 2-day events.

The fifth annual Federal Government Career Day is scheduled for Wednesday, February 13. The event is sponsored by the Division of Career Education and Place-

ment in conjunction with the Houston Area office of the U.S. Civil Service Commission.

Departmental activities will include seminars, dramas, readings, book reviews, movies, films, and exhibits. The WR Banks Library is sponsoring a Film Festival which includes nine showings

featuring outstanding black artists and leaders.

The Drama Department has scheduled events for February 7, 9, 21, 25 and 27, all to be staged in the theatre in Hobart-Taylor Hall.

The History Department will sponsor several activities of its own in addition to coordinating campus-wide events.

PLANNING TV HISTORY SPOTS — Al Varela, Channel 11 Public Service director, was on campus last week working with University Information personnel and students in developing TV spots highlighting Black History Month throughout February. With Mr. Varela are (L-R) Benny Boone, PR Consultant, Jack Weeks, News Director, and C. A. Wood, Director of PV Information Services.

PV-TSU Students to Be Featured In Black History TV Spots

Several Prairie View A&M University students will be chosen to appear on KHOU-TV during Black History Month of February for one minute public service spots.

Some dozen or more have been auditioned by producers from Channel 11, and taping of the minute spots will begin next week.

The students have chosen their favorite person in Black History, researched their subject and written their historical contributions for the 60-second spots.

Al Varela, Channel 11 Public Service Director, says

he and his taping crew should arrive on the Prairie View campus at 9 a.m. Monday.

"We want to film the students at various locations on campus, to show as much of Prairie View as possible, Varela said. "Some of the taping will be done outside, and some inside, depending largely on subject matter."

Those who have volunteered for the project include Pamala Shields, Delores Clack, Charlotte Leviston, Cheryl Hackett, Carlos Pierott, Theresa Bullard, Frederick Wade, Curtis Stansberry, Lillian Randle, Robert Bentford, and Frank White.

PV Development Plan Ready

A "Long-Range Development Plan" for Prairie View A&M University is nearing completion according to Dr. A. I. Thomas, president of the University. The comprehensive report will project PVA&M's goals throughout the 80's.

Public Hearing on Waste Disposal Project Set

In keeping with provisions of the "Solid Waste Disposal Act," Article 4477-7, Vernon's Texas Civil Statutes, a public hearing will be held by the Texas Department of Health on January 31, 1980, at 10:00 a.m. on the application for a permit by Prairie View A&M University for a municipal solid waste landfill. The hearing will be held in the President's Office, Prairie View A&M University. The facility involved is a proposed 18-acre Type I landfill to be located in the north part of Prairie View, on the south side of FM Highway 1098, and in the northwest part of Prairie View A&M University Campus.

Set February 5-6 —

Annual Ministers Conference To Focus On Black Leadership

By Frank White
About 500 members of the

clergy will convene at Prairie View A&M University Febru-

ary 5-6 to better understand how two institutions — the black church and the predominantly black college — have worked together to nurture black leadership.

The 22nd Annual Minister's Conference will have as its theme: "The Black Church and Predominantly Black College: Historical Partners in the Development of Black Leaders."

In all, there will be five guest speakers during the two-day conference: Dr. William Bill Jones, pastor of Bethany Baptist Church, Brooklyn; Samuel Green, bishop of the Church of God in Christ, Newport News; E. A. Morgan, bishop of the Church of the Living God in Christ, Decatur, Illinois; H. Thomas Primm, bishop of the A.M.E. Church, Nashville; and Dr. Wyatt L. Walker, pastor of Canaan Baptist Church, New York City.

Dr. Walker will be the featured speaker at the Minister's conference, which will draw the students, faculty, staff and administration as

A HEAP OF PV HISTORY — Thousands of grads and ex-students, male and female, made Luckie Hall their home during college careers. Now it is being demolished — making way for newer and more modern facilities. Built in 1912, the dormitory was named for Professor C. W. Luckie (1898-1909).

Highlighting
Afro-American
Life and History

STUDENT-
FACULTY
ART
EXHIBIT

February 11-26

Art produce by talented young black artist is a valuable contribution to our American Culture. It often possesses deep psychological and intellectual qualities, frequently subtle and sometimes highly pronounced. What ever the case may be the Afro-American artist remains greatly ignored and unappreciated.

During the recognition of Black History Month the Department of Art will display an exhibition of works by students and faculty. The exhibit entitled "Visual Perspectives" will focus on numerous styles and directions in art. A multiplicity of paintings, drawings, photographs, commercial art and crafts are included in the exhibit.

Engineers' Council (ECPD) Changes Name

The Engineers' Council for Professional Development, Inc. (ECPD) founded in 1932, has undergone major organizational changes this year as a result of a major study started in 1977. With the approval of its 19 member societies, representing 674,843 engineers

in the U.S., the ECPD has officially changed its name to the Accreditation Board for Engineering and Technology, Inc. (ABET). This change is effective January 1, 1980.

The Engineering Education and Accreditation Committee (EE&A) and The Engineering

Technology Committee (ET) have also changed their names. They have been renamed the Engineering Accreditation Commission (EAC) and the Technology Accreditation Commission (TAC), respectively.

Under the new structure ABET continues to be responsible for accreditation activities in engineering, technology and engineering-related areas keeping the same autonomous and independent status as that of the ECPD.

Currently, there are 239 colleges of engineering with 1295 ECPD/ABET accredited programs. In technology, there are 565 accredited programs, either two or four year, at 159 institutions of higher education. Accreditation of these programs is the responsibility of the accreditation commissions which in 1979 conducted 552 accreditation visits involving the same number of visitors who contributed their time and effort to assure the public that the accredited programs fulfilled the criteria established by the profession. This volunteer effort represents over 4000 man-days. Coupled with the ECPD/ABET operating budget of \$998,000 it represents a significant commitment by the profession to insure the viability of the accreditation program which attests to the quality of engineering and technology education in the U.S.

ABET will continue all accreditation and other educa-

tion-related activities currently operating under ECPD. However, the ECPD/ABET Board of Directors has approved the transfer of several educational functions not directly related to accreditation to the appropriate Councils of the new umbrella organization, the American Association of Engineering Societies (AAES) over the next 12 months. The assignment of these non-accreditation activities will occur when the Councils are viable and able to accept the responsibility for these functions.

The ECPD/ABET in its 47th year of continuous operation, remains as a unity organization in the education area for the engineering profession. The purpose of ECPD/ABET is stated in its constitution as "... the promotion and advancement of engineering education with a view to furthering the public welfare through the development of the better educated and qualified engineer, engineering technologist, engineering technician, and others engaged in engineering or engineering related work."

At present the member organizations of ECPD/ABET are:

- American Congress on Surveying & Mapping (ACSM)
- American Institute of Aeronautics & Astronautics (AIAA)
- American Institute of Chemical Engineers (AIChE)
- American Institute of Industrial Engineers (AIIE)
- American Institute of Mining, Metallurgical and Petroleum Engineers (AIME)
- American Nuclear Society (ANS)
- American Society of Agricultural Engineers (ASAE)
- American Society of Civil Engineers (ASCE)
- American Society for Engineering Education (ASEE)
- American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE)
- American Society of Mechanical Engineers (ASME)
- Institute of Electrical & Electronics Engineers (IEEE)
- National Council of Engineers Examiners (NCEE)
- National Institute of Ceramic Engineers (NICE)
- National Society of Professional Engineers (NSPE)
- Society of Automotive Engineers (SAE)
- Society of Manufacturing Engineers (SME)
- American Academy of Environmental Engineers (AAEE)
- American Society for Metals (ASM)

ALL FAITHS CHAPEL GIFT — President A. I. Thomas and Rev. W. Van Johnson are pictured accepting gift of \$550,000 for Chapel funds which was secured by Mr. William Chester of San Francisco, California. He is represented above by a family relative, Mrs. Mary Clark, Associate Director of Admissions.

Insider Magazine Gives Tips on Summer Jobs

"Summer Jobs: The Search is ON!" is the title of the winter issue of Ford's Insider, a 24-page full-color supplement to The Panther, scheduled to appear February. Each Insider issue deals in

depth with one feature topic of interest to college students. The upcoming issue advises students on how to get ahead in the summer employment crunch. It also provides valuable tips on making good impressions at job interviews and using school placement centers and state employment services as resource centers. There are even useful listings of books, addresses, and summer job services to aid in the job search.

Insider, which is in its third year of publication, is sponsored entirely by the Ford Motor Company in their efforts to provide services to college students. 13-30 Corporation — the nation's largest college magazine publisher — edits, designs, and distributes Insider for Ford.

Of the nine million living armed forces veterans who served during the Vietnam Era, 32 percent had duty in the Vietnam theatre of operations.

All-Faiths Chapel Drive Submits Financial Report

The All-Faiths Chapel Drive has reached a total of \$177,206.19, Reverend W. Van Johnson, Dean of Chapel, announced.

Reverend Johnson submitted the following Financial Report.	
Balance Brought Forward	
January 1, 1976 to December 31, 1976	\$ 500.00
January 1, 1977 to December 31, 1977	3,055.00
January 1, 1978 to December 31, 1978	41,077.64
January 1, 1979 to December 31, 1979	122,935.75
January 1, 1980 to January 11, 1980	100.00
Total Interest Earned From January 1, 1978	
To December 31, 1978	311.72
Total Interest Earned From January 1, 1979	
To January 18, 1980	5,387.63
Total Interest Earned on \$75,000.00 Gift From Houston Endowment, Inc. From July 25, 1979	
To December 31, 1979	3,788.45
Total Gifts Received to January 11, 1980	177,156.19
Total Gifts Received January 12, 1980	
To January 18, 1980	50.00
Total Gifts Received to January 18, 1980	177,206.19
OVER ALL TOTAL:	
Total Gifts Received From January 1, 1976	
To January 18, 1980	\$177,206.19
Total of Unpaid Pledges	56,871.00
Over All Total	\$234,077.19

Reflections of AKA

By Beatrice Moore
Welcome back to a new semester at Prairie View, and may it be beneficial to all. The Sorors of Alpha Kappa Alpha extend their sincere wishes of happiness to all. The sorors of Alpha Kappa extend an open invitation to all students to

attend the activities planned for the Spring Semester, and there will be a lot in store and plenty of fun for those interested.

Soror Penny Songy was named the South Central Region "Epitome of an Alpha Kappa Alpha Woman." Soror Songy was chosen because of her high scholastic standing, charming personality, campus activities, and special programs which she has attended and numerous awards received. Congratulations Soror.

Sorors Rosiland Jones, Sharon Stafford, Helen Carden graduated this past December, and we wish them success. Sorors Carden and Jones are presently working on obtaining their Masters Degree in their perspective fields of interest.

We also congratulate all students listed in Who's Who for this year and hope they continue their success in the upcoming years.

Hearing—

ties throughout Texas are under the jurisdiction of the Texas Department of Health and are required to be operated in accordance with the Department's "Municipal Solid Waste Management Regulations." The Department's jurisdiction includes the collection, handling, and storage of solid waste and disposal by energy and material recovery, sanitary landfill, composting or other approved methods.

"The Family"

By Matthew A. Castille
When we think of colleges and universities, we look upon such institutions as being families. And, like members of any family, we can learn from each other. At an institution such as Prairie View, there is much to be learned both academically and socially.

To improve upon the areas where we might be weak, each of us can practice copying the better traits of others and

GROOVE PHI GROOVE SOCIAL FELLOWSHIP INC. 1962

The Nations Largest Black Social Fellowship Organization

We The Brothers of Groove Phi Groove have a strong Fellowship beyond reproach. We have always had it, and shall have it in the future.

Groove do not pledge scholars, partyers, top athletes, or big names. We pledge brothers, who are also scholars, athletes, and big names.

In the tradition of Groove we do not pledge people who need us. We want Brothers who can do without us or any other college group to support them. We want faithful, hardworking, independent "Thinking Men" — men who can make sacrifices and contributions toward something they believe in. These are men who will keep the fellowship in everlasting existence throughout the nation.

The kind of Brotherhood the fellowship offers is unique and that's what makes Groove Phi Groove unique — Brotherhood in touch with Blackness.

That is why the Brothers of Groove Phi Groove want to pledge you.

Northrop P-61's Lead the Way as MacArthur Returns to Philippines

October 30, 1944 - Leyte Gulf, Philippines

Gen. Douglas MacArthur stood proud and erect on the bridge of the light cruiser NASHVILLE last week as she sailed into the green waters of Leyte Gulf. He had returned, keeping the promise made in March of 1942. Bomber-size P-61's from Northrop, radar-guided fighter aircraft with a 66-foot wing span, guarded the skies for his safe voyage.

First American fighter designed specifically for night interception, the twin-engine P-61's reached the Pacific combat zone earlier this year. Designed by Jack Northrop, the giant "Black Widow" is being produced in 13 different models at the company's Hawthorne plant, one of the first in the industry to be automated. "Our first large-scale production order is on schedule," says Northrop. "Our P-61 aircraft is in combat service in both the Pacific and European theatres."

January, 1980

Northrop Aircraft is still designing and building high-performance aircraft, today in the company's mile-long, modern complex at Hawthorne. After 40 years we're still promoting our people as well as our products, offering excellent salaries and benefits, including generous vacations—the week-long Christmas Holiday is another Northrop innovation in the aircraft industry. Above all, we take pride in our management philosophy:

Northrop Aircraft's P-61 Night Fighter

our employees are not simply "cogs" in an industrial machine, but creative individuals with intelligence and dignity to be respected, and ambitions to be realized.

Northrop Aircraft today is still encouraging and promoting creative technical people. If your interests are in AERONAUTICAL ENGINEERING, ELECTRICAL ENGINEERING, MECHANICAL ENGINEERING, MANUFACTURING ENGINEERING, METALLURGY, MANUFACTURING TECHNOLOGY, or INDUSTRIAL ENGINEERING, see Northrop today for your

The Art of Being

The art of being is the assumption that you possess those qualities of spirit and attitudes of mind that make for radiant living.

It is following the maxim of Shakespeare: "Assume a virtue though you have it not" . . . knowing that the dynamic power of habit can build it into your character.

It is being great now, being forgiving now, being tolerant now, being happy now, being successful now, instead of postponing positive and constructive living to some vague and indefinite future.

It is wasting no time dreaming about the rich life you may live next year, or ten years from now; it is beginning to live at your best right now, today.

It is heeding the wisdom of the ancient Chinese seer who observed: "A journey of a thousand miles begins with a single step," and it is taking that step today.

It is beginning today to be the person you want to be.

It is my wish that everyone had a very lovely Christmas and will have a very successful 1980. The future belongs to those who prepare for it.

Ralph Waldo Emerson

PV Artist to Exhibit Works at UH Downtown

"Perceptions of Life" an exhibition of art work by Clarence Talley will be on display at the O'Kane Gallery, University of Houston, Downtown College, Houston, Texas, February 4 through 24, 1980. The opening reception will be held Tuesday, February 5 from 7:00 to 9:00 p.m.

Mr. Talley is presently exhibiting in the National Exhibition of Works on Paper, Columbia College, Columbia, Missouri. Talley is a member of the Art Department, Prairie View A&M University, Prairie View, Texas.

Clarence Talley

Kollar Korner Blessings in Disguise

By Rev. R. F. Garrett
Metropolitan CME Chapel
CME Student Association

Does God really answer prayers? This question has been debated through the years by all manner of men. We all too often wait so long before asking for his guidance that we become impatient for His response and never truly recognize His blessing when it comes. God's works are mysterious to us and we well may not know when or how our prayers will be answered.

There is a story of a young married couple who had been having marital problems for several months which had caused them to be drawn apart to the point a divorce had been considered. Feeling their immediate environment and financial problems were at the root of their differences, the husband accepted a job across the country in hopes that his move might help. Upon the advice of their parents the couple prayed that God help them during their problems.

While driving to their new home they had an auto accident which left the wife paralyzed and caused the husband such a long delay in reporting for his new job that the company had hired someone else when he got there. Faced with numerous doctor bills and several months of unemployment, the couple began to rely more on the power of prayer, and were drawn close together because of their need for each other. The marriage was ultimately reunited and the husband did secure a job to make an adequate living for he and his wife.

There are two ways this couple could have looked at the auto accident. First, it could have been looked upon as God having ignored their prayers and allowed them to have more bad luck. At that point they would have given up, separated and gone throughout their life not believing. Secondly, the accident could have been looked at as a Blessing in Disguise. While it did cause some physical pain and mental anguish, the marriage was saved and the husband did finally get a good job.

It is hard to imagine that an auto accident with that much suffering could be a blessing, but if we remember Jesus suffered on the cross for us that we might have the right to the tree of life. Have you counted your blessings lately, but be careful some may be Blessings in Disguise.

OPPORTUNITIES WITH THE VICTORIA PUBLIC SCHOOLS

The public schools in Victoria, Texas will have a limited number of vacancies for the 1980-81 school year. Interviews will be conducted on the Prairie View A&M University campus at the Placement Office on February 27. Interested parties should contact the Placement Office for an interview time.

The Victoria schools have a good salary schedule, provide free hospitalization and life insurance, and offer excellent facilities in which to work.

For additional information, write: Victoria Public Schools, P. O. Box 1759, Victoria, Texas 77901.

Politics Who and Why

By Hedy Ratcliff

The 1980 Presidential campaign is now in progress and the delegates to the Democratic and Republican National Conventions of 1980 are getting prepared, for the most versatile form of competition. The delegates will have the ultimate power of deciding, which candidate they think is capable of representing the principles and interest of their political party sufficiently as a contender, for the office of the Presidency.

The two dominant candidates seeking the Democratic nomination are incumbent President Jimmy Carter and Ted Kennedy. Further, they both have their campaigns designed to emphasize issues that will produce a continuous reaction from the people in America, who are interested in the circumstances that will either benefit or hinder their livelihood.

Ted Kennedy had a slight advantage over President Carter in the popularity polls and it seemed as though most of the American people were going to jump on his band wagon and take him all the way to the highest executive office in the land. Further, the main reasons many Americans expressed for not supporting President Carter again was that he was inactive and he lacked the ability to develop adequate solutions to the

various problems affecting the economy of the nation, because he appeared to be a weak leader.

However, little did anyone know or perceive that something so deplorable and heartless was going to occur thousands of miles away that would stimulate the minds and attitudes of the American people. Yes, the Iran crisis united Americans toward a common goal, while it divided the victims of the crisis from their families. Surely, the man everyone immediately concentrated on was President Carter and his intentions to deal with the delicate situation in Iran.

His primary objective was to peacefully gain the release of the hostages without unwillingly initiating the possibility of World War III, which could be influenced by other countries. President Carter, unexpectedly projected a vulnerable image and his "we will protect you" attitude encouraged many Americans to participate in helping to insure the release of the hostages. Regretfully, the matter still remains unsolved, but President Carter has risen tremendously in the popularity polls and his chances for re-election seem to be getting better everyday.

Regardless of all the events, which have given the Democrats constant attention, the Republicans are not sitting

Six stories, one plot: The Romance of Our Age is Technology.

Rendezvous In Spain.

You're a software applications specialist. When you picked this career, you never dreamed that one day you'd rendezvous in Barcelona, Spain with two Navy destroyers.

But when your company is Texas Instruments and one of your customers is the U. S. Sixth Fleet, you learn to expect the unexpected.

The destroyers are equipped with TI computers and they need new software fast. You come aboard and sail with the Fleet until your job is completed.

Not a bad assignment for a software specialist named Susie. You're glad you got into technology.

The Incredible Talking Chip.

You're an integrated circuit designer at TI. You've helped find a way to make a chip talk, something no integrated circuit has ever done before.

First application: an electronic aid that helps children learn to spell. The world's first talking textbook.

And that's just the beginning. The talking chip's potential is mind-bending. You're glad you got into technology.

The Salesman's Dream.

You're a TI sales engineer. You've got what is probably one of the most irresistible selling messages in the history of salesmanship.

It goes like this: "Hold this TI-59 Scientific Calculator in your hand. Now, let's compare it to the most popular computer of the 1950s—the IBM 650."

"The 650 weighed almost three tons, required five to 10 tons of air conditioning and 45 square feet of floor space. And it cost \$200,000 in 1955 money."

"Now look at the TI-59 Calculator you're holding in the palm of your hand. It has a primary memory capacity more than double that of the 650. It performs its principal functions five to 10 times faster. And it retails for under \$300."

With a story like this, the hardest part of your job is holding onto your sample. You're glad you got into technology.

The Joy Of Complication.

You're in semiconductor design at TI. You love it when people at parties ask you what you do. You say, "I make things complicated." (Pause.)

"In fact, I got promoted recently for creating some major complications."

What you mean (but seldom explain) is this: the more active element groups (AEGs) you can put

on a single chip of silicon, the more the average AEG cost goes down.

In short, you make things cheaper by making them more complicated. Your work made it possible for a TI consumer product that sold three years ago for about \$70 to sell today for \$14.95.

Your future looks wonderfully complicated. You're at about 100,000 AEGs per chip now and 1,000,000 is in sight.

You're glad you got into technology.

Outsmarting Smog.

You've always designed airborne radars for TI customers. Now, all of a sudden you know your next radar design is going to stay at the airport. On the ground.

It's on the ground that traffic controllers at Los Angeles International Airport have a problem. They can "see" incoming and outgoing airplanes on their radar just fine, so long as the airplanes are in the air.

But when the airplanes are on the ground—touching down, taking off, taxiing, parking—they are sometimes impossible to see and control. Ground smog obscures them.

You believe you have an answer to the smog problem. You dig out the plans for an airborne ground-mapping radar you helped design. You adapt the design so the L. A. controllers can use it to see through smog. It works beautifully.

Today your smog-piercing radar is widely known as Airport Surface

Detection Equipment (ASDE). It's standard equipment at L. A. International and at the airport in Geneva, Switzerland. Other airports with smog and snow problems are expected to have it soon.

You're glad you're in technology.

Oil Sleuths International.

You're a geophysicist. A good one. You could be with any of the big oil companies. But you wanted to get with a company whose specialty is the same as yours. Exploration.

That's why you're at TI, in Geophysical Service.

TI explorer ships, TI photographic aircraft and TI truck- and tractor-mounted vibrator systems are working all over the world. They're finding oil. And they're identifying areas where no oil exists, thereby saving huge losses in drilling costs.

Also, TI's worldwide computer network and its Advanced Scientific Computer is making 3-D recording and processing possible. This exclusive exploration technique is the only practical way to unscramble "no-record" areas on land and sea.

You're a happy sleuth. You're in on the biggest hunt in history. And your team is out in front.

You're glad you got into technology.

If you're not in technology yet, think it over.

Alpha Kappa Alpha Sorority News

Soror Olivette J. Higgs, Acting Head of the Department of Modern Foreign Languages, Prairie View A&M University, was selected on a nationwide competitive basis as a participant in the Workshop on Foreign Languages and Literature Programs funded by the National Endowment for the Humanities.

The Workshop, sponsored by Purdue University, was held on December 27 through December 30, 1979, during the Modern Languages Association Convention in San Francisco, California.

Soror Higgs holds degrees from Arkansas AM&N College, Atlanta University, and has done additional study at the University of Texas, University of Colorado, and ESPPPFE of the Sorbonne University, Paris, France.

Soror Higgs is the wife of Mr. George E. Higgs, Federal Program Director of the Waller Independent School District, and the mother of two children: Cherie, a teacher in the Friendswood High School; and Marcus, a 9th grader in the Waller High School.

Soror Higgs is actively

Olivette J. Higgs elected in national competition.

affiliated with a number of professional, civic, social, and community organizations. She is an active member of Zeta Gamma Omega Chapter and a Life Member of Alpha Kappa Alpha Sorority, Inc.

Family Planning Clinic

A family Planning Clinic was scheduled for Saturday, January 26 at the Owens-Franklin Health Center.

All services were free and available to everyone.

PV Participating in Conference On Food and Hunger

By Brenda D. Curry
"To devise answers to existing hunger problems in Texas and establish a continuing line of communication and action to work on elimination of hunger in Texas" was the objective of a 3-day consultation conducted at Texas A&M University recently.

Prairie View A&M University and numerous agencies from across the state participated in the conference. Speakers and exhibits focused on the shared concern of churches and the state's land-grant universities about people who experience hunger daily.

Senator Ralph Yarborough addressed the opening session on the political realities of hunger. During another session, PV Extension specialist Benny Lockett presented a slide set depicting work being done through the Intensified Farm Planning Program to assist low-income farm families in increasing quality and quantity of their food supply.

Other Houston-area participants included Sister Pearl Ceasar, Houston Interfaith Hunger Coalition; Arenia Edwards, Welfare Rights Organization; and Arnold

Benny Lockett, Extension small-farming program specialist, addresses State Consultation on Food and Hunger held recently at Texas A&M University. Mr. Lockett presented an overview of work being done with low-income farm families enrolled in the Extension Intensified Farm Planning Program. (See story)

Brown, Landowners Association of Texas.

Before adjourning, the conference outlined an action agenda in which efforts were planned that would further extend the impact of this conference.

Nearly 3 of 4 veterans with military service during the Vietnam conflict have applied for benefits under the current GI Bill.

AKA Wants To Know - Are We Ready For The 80's?

As we look back on the decade of the 70's, many things come to mind. There were great strides in Women's Liberation, Gay Rights, Civil Rights and most any other kind of "right" that one would care to mention. They served the purpose of opening our eyes to the fact that our world is changing, and is doing so quickly. We no longer wait years to see our dreams of equal opportunity come true. There are no longer giant obstacles falling upon the women of our society. We all are finding our place.

Yes, progress is in the making and we are making progress. But we must not let our past achievements hinder us from seeking more. As the new decade begins, we must enter into it as we did the past decade, with goals of making this world a better place to be. So we all must ask ourselves, "Are we ready for the 80's?" because if so we will continue to fight for justice and equality. We can never be content with the status quo. The question is one of survival. Will our world survive? With all the positive progress there is also negative. Are we ready to sit back and let others make the decisions that we will have to suffer behind? We must become more involved in politics, and understanding our world. The world effects our lifestyle, so we must continue to seek out the bad.

The 80's aren't much different from any other decade, except technology has advanced. There are still the age old problems of poverty, war, crime, drugs, and rebellion in the youth. So, will we be able to accept the responsibilities which come with the 80's, yes. After all, it's just another decade.

National, World & State NEWS BRIEFS

GRAIN BOYCOTT TO CONTINUE

GALVESTON — A longshoremen's union official said dockworkers would continue their boycott of grain bound for the Soviet Union despite farmers' charges the action was illegal.

Three national farm bureau organizations filed the complaint Wednesday with the National Labor Relations Board in Houston against the South Atlantic and Gulf Coast International Longshoremen's Association and two Houston locals alleging an illegal secondary boycott.

IRANIANS VOTE FOR FIRST PRESIDENT

At the behest of the bedridden but reportedly recovering Ayatollah Khomeini, Iranians cast ballots last week for their first president while roving government teams advised illiterate voters to "find someone you can trust" to fill in the blanks.

The country's 22 million eligible voters about half of them illiterate were urged to vote for the largely figurehead post by Ayatollah Ruhollah Khomeini who reassured them in a recorded message the day before the election his health was "not bad."

CARTER'S SPEECH GETS APPROVAL

President Carter's sharp attack on the policies of Russia, and his call for a resumption of draft registration are both solid shows of strength and are a good sign for Americans, political science experts said following the State of the Union message.

In a speech last Wednesday, Carter called for a draft registration that would require all young men, and perhaps women, from the ages of 18 to 26 to tell the Selective Services system their names and addresses, and their parents' names and addresses.

Carter also called for a review of the strength of the nation's intelligence agencies.

BLACK POLL SHOWS BIAS CONTINUES

NEW YORK — Discrimination emerges from the first Data Black Poll as a widespread and current problem for black Americans.

Over one-third of 1,146 blacks polled spontaneously mentioned discrimination as among the two or three most important problems facing blacks today. More than a majority said they have personally experienced discrimination.

Job discrimination is a particularly pressing problem for blacks, the poll revealed, among the major findings of the first in a series of quarterly polls sponsored by Data Black, the new polling firm founded by Dr. Kenneth B. Clark and Inner City Broadcasting with consulting by the New York-based firm of Dresner, Morris and Tortorello Research at the end of 1979.

2. Do You Love What You Feel — Rufus & Chaka
3. Ladies Night — Kool & The Gang
4. I Wanna Be Your Lover — Prince
5. Send One Your Love — Stevie Wonder
6. Do That To Me One More Time — Captain & Tennile
7. Rappers Delight — Sugar Hill
8. Forever Mine — O'Jays
9. Please Don't Go — K. C. & The Sunshine Band
10. Cruisin — Smokey Robinson

Superman Coming To PV

By Photo Play Club

What's more faster than a speeding bullet. More powerful than a locomotive. Able to leap tall buildings with a single jump. Look up in the sky, it's a bird, it's a plane, it's Superman.

Superman as a baby was sent to earth by his father, Jor-el before their planet Krypton exploded. On earth disguised as Clark Kent, a newspaper reporter working for the Daily

Planet, he fights for truth and justice the American way.

In the movie, Superman falls in loves. Does battle with Lex Luthor, the greatest criminal mind of all time. He saves half of the state of California from sinking into the Pacific Ocean and changes human history. The Photo Play Club will show Superman the movie February 20, 1980 at the Campus Theater at 7:30 p.m.

1979 MACHO MAN — Tom Carrol

The PV Macho Man Contest

On December 6, 1979 the Institute of Electrical and Electronics Engineers (IEEE) sponsored the first Prairie View A&M University Macho Man Contest. The program was held in the University Memorial Center Ballroom and was a tremendous success.

predominantly white institutions. "Many were misled in thinking they had full participation in the predominantly white college academically, politically and socially. Many can't get in the societies — in 1980, I think the trend should be for blacks to start going back to the predominantly black colleges," he says.

"Another tragedy is that our black leaders are not speaking out. You can say what you want about the Iranians; they're all saying in unison 'we want the Shah'. Blacks should be unified in saying, 'We want our black institution to survive'. It's funny — you never hear of anyone talking about the survival of Harvard, Princeton or Yale," Johnson says.

What is the greatest harm done by the credit card, something which nearly every business hands out to anybody who can scrawl his or her name? It leads us into temptation and delivers us to evil.

The 1979 Prairie View A&M University "Macho Man" is Mr. Tom Carroll. Tom is 20 years of age, an Architecture major, and a native of Fort Worth, Texas. The second place finisher for the contest was Mr. Lawrence Pace, from Houston, Texas. The participants in the program were judged in the categories of Sports Wear, Casual Wear, Formal Wear, and Talent. The judges for the program were Ms. Margarite Sherrod, Mrs. June Aikens, Ms. Nikki Torian, and Ms. Sylvia Roberts.

Commentary for the 1979 presentation was delivered by Ms. Shelia Powell, IEEE Activity Committee Co-Chairman, and also Ms. Shirley Deese, IEEE member. Also assisting in the organization of the program was Ms. Alane Mavis, Mr. Ervin Emanuel, IEEE Branch Counselor; Dr. John Fuller, Electrical Engineering Department Head; Mr. Sam Daruvalla, IEEE Branch Counselor; and numerous other members of the society. The IEEE is planning to donate a portion of the proceeds to the University Centennial Development Fund. The IEEE is also looking forward to a prosperous Spring semester full of activities. Presently in the planning stages is the Prairie View Marathon.

(Humor) By Ronnie Smiley
This is a short guide to help you learn something about your major and college.

College of Arts and Science — This college was set up for soft-headed leftovers from the '60's who still think it's a crime to make money. It contains the departments of English (for those who liked to get mistreated); a Department of chemistry (for those who aspire to know nothing and be alcoholic by the time they graduated); a department of Biology (for those who really don't want to make a living). This college contains many other useless departments, including History, Drama, Music, Physics, Mathematics and Communications, all tailor-made to see that you don't ever have to live with the guilty brought on by earning a living with your degree.

College of Agriculture — There are jobs to be had out of this college, if you want to spend four years in a smelly lab, contaminated with all kinds of icky bacteria.

College of Business — This college is for the poor student who still believes a college education guarantees a job. A graduate of PVAM's fine college of business is almost assured of a job fitting fat ladies with corrective shoes in the local Flagg Brothers. One holding a degree from the

excellent MBA program here will almost certainly be named assistant manager of the same store.

College of Education — This college prides itself in having departments which have gone, quite literally, entire years without handling out a single D or F.

College of Engineering — This is not a bad major if you're looking to make a few bucks. The only hitch is that you'll have to spend your four years walking around wearing a calculator and a knife on your hips. The knife is for protection because the rest of the student body doesn't like you. You won't be allowed to read any literature thoughier than "Beetle Bailey."

College of Home Economics — This college is for women whose main reason for coming to college is to find a husband. This makes you wonder about the men!

College of Nursing — If your heart still bleeds freely after you spend your 2 years in Houston, then this is your place.

College of Industrial and Technology — No one is quite sure exactly what is done over there. I heard through the grapevine that this college is for those who have uncles in the Mafia who want to set their nieces and nephews up to recruit.

Alpha Kappa Alpha Lists Nine in Who's Who

By Beatrice Moore
The Sorors of Alpha Kappa Alpha Sorority are proud to announce that 9 members of the sorority are included in this Years addition of Who's Who Among Students in American Universities and Colleges. They are:

Anita Berry, senior in Biology who will be pursuing a career in Denistry. She is from Prairie View and is a member of Beta Beta Beta, and Alpha Kappa Mu Honor Societies. Felecia DeLoach, senior in Business Education and is presently involved in student teaching and is a member of the Honor Society for Business students. Miss DeLoach is a native of Shreveport, Louisiana. Cathleen Goines, senior in Pre-Med Biology, a member of Alpha Kappa Mu, Alpha Mu Gamma, and Beta Beta Beta Honor Societies. She is planning to attend Medical School and pursue her goal of becoming a doctor. Cathleen is from New Orleans, Louisiana.

Beatrice Moore, senior in Spanish from San Antonio. She is a member of Alpha Mu Gamma Foreign Language Honor Society, The Forensics Society, and Junior Fellow Association. She plans to obtain her Masters' Degree in Reading. Fernita F. Parker, senior native of Houston, a biology major, member of Alpha Kappa Mu, Beta Beta Beta Honor Societies. Fernita also plans to continue her education by entering Medical School and becoming a doctor. Sonja Randle, senior and a native of Houston. Sonja is also a Pre-Med student and plans to attend Medical School. She is a member of Alpha Kappa Mu and Beta Beta Beta Honor Societies.

Sharon Stafford is from Prairie View. She graduated this December and was a Elementary Education/Mass Communications Major. She was a member of the Canterbury Association. She will begin teaching this year in Crockett, Texas. Nikki Torian is a native of Savannah, Georgia. She is presently the reigning Miss Prairie View and is a Mass Communications Major. She is also a member of the Synchronized Swimming Team. Diane Traylor, senior

NEED A SECOND CHANCE?

If you want to continue your education, no matter what your age, study money can be yours.

down with their hands folded. The major candidates seeking the Republican nomination are Ronald Reagan and John Connally. Nevertheless, George Bush is gaining support steadily throughout the states. Indeed, the vitality of the 1980 Presidential campaign is that, it will reflect the ideas and ambitions of a mass majority of the American people. Therefore, the candi-

SALT VITAL TO DEFENSE PLAN

Washington — Defense Secretary Harold Brown warned Congress Thursday Senate rejection of the SALT II treaty would force the White House to further increase President Carter's ambitious five-year defense program. President Carter announced his defense plan, with special emphasis on a 110,000-man "rapid deployment force" at a White House meeting Wednesday.

Photo Contest Sponsored by MSC At Texas A&M U.

A photo contest for amateur collegiate photographers, Salon '80, has been announced by the Memorial Student Center Camera Committee at Texas A&M University. To be judged Saturday, March 1, the competition is open to non-professional student and faculty-staff photographers of colleges and universities. Salon '79 winners included entries from Odessa College, East Texas State and Sam Houston State Universities, the University of Texas at Austin and West Germany.

Prizes including Best of Show plaques and \$50 each in color and black-and-white will be awarded. First, second and third place ribbons will be given in 11 categories. A plaque will go to the institution with the most winners.

Entries will be accepted in candid, casual and formal portraiture, architecture, commercial, experimental, landscape, nature, photojournalism, sports and still life categories. Winning prints will be exhibited through March 28 at Texas A&M.

Committee Chairman Ken Moses said preliminary judging the morning of March 1 will be open to visitors. Three professional photographers will judge the contest, an annual event at Texas A&M for more than 20 years.

Information and entry forms are available from the Camera Committee, P.O. Box 5718, Aggieland Station, College Station, Texas 77844.

"The press, if it is to live up to its great tradition — if indeed it is to live at all — must be free!" — Winston Churchill

Track and Field Clinic Held on PV Campus

By JoAnn Alderson Hoover Wright and Ms. Barbara Jacket, track coaches at Prairie View A&M University headed the list of speakers at the inaugural Prairie View Track and Field Clinic on January 25. The one day program was devoted to lectures, demonstrations and activities designed for individuals whose interests extend to sprinting, middle distance, hurdling, relays and field events.

Wright, track coach at Prairie View since 1961, has served on 1972 Olympics coaching staff, as president of the National Association of Intercollegiate Athletics track coaches association and has been named NAIA Southwestern Athletics Conference coach of the year. His track teams have won four national and two conference titles. Ms. Jacket, track coach since 1965, has won five national championships, two indoor and five outdoor track championships. She has served as the United States coach for the freshman team in West Germany, Poland and Russia, she was also the United States coach for the dual meet against Russia, coach of the University games in Hungary and coach for the Pan American games in San Juan, Puerto Rico. Wright lectured on pre-season training for 400 and 800 meter running and pole vault and javelin. While Ms. Jacket lectured on 4x400 and 4x800 meter training. Other clinic participants included Jacqueline Williams coach in the North Forest Independent School District. Herman Goldberg, track coach See CLINIC on 3rd Column

PANTHER CHEERLEADERS

GRADUATING ENGINEERS

Have you considered these factors in determining where you will work? 1. Will the job offer challenge and responsibility? 2. Will your future employer encourage job mobility? 3. Will your future employer encourage, support and reward continued professional education? 4. How much choice will you have in selecting your work assignment? 5. Big starting salaries are nice — but what is the salary growth and promotion potential in the job? 6. Can you afford the cost-of-living in the area? At the Naval Weapons Center we have given these things a lot of consideration and believe we have the answers for you. Arrange through your placement office to interview with our representative! Manny Dunn on February 14 We think you will like what you hear.

If you cannot fit an interview into your schedule, write or call: C. KAREN ALTIERI Professional Employment Coordinator NAVAL WEAPONS CENTER (CODE 09201) China Lake, CA 93555 • (714) 939-3371. Includes logo for the Naval Weapons Center.

REA E.E. SENIORS

LOOK into the engineering opportunities open in rural electrification and telephony. ASK your Placement Office for pamphlets telling what the Rural Electrification Administration offers for a challenging career with all advantages of Federal Civil Service. SIGN UP for a personal interview with the REA Recruiting Representative who will be at your Placement Office February 6, 1980. NO DISCRIMINATION

Clinic —

CONTINUED from last column track coach at Prairie View A&M University and Dr. Hollie A. Ryder, AAU record holder for the one-hour run, five kilometers and 10 kilometers and co-founder and first vice-president of the Columbia track club in South Carolina. There were about 25 High School Coaches, students and recreational specialists who appeared at the Clinic Lecturer. The program was sponsored by the Department of Health, Physical Education and Recreation.

Rodeo Club to Sponsor March Events

The PV A&M Rodeo Club will sponsor a major Rodeo during early March, according to Chandra Adams, Club secretary and treasurer. Rodeo Station KMJQ of Houston is expected to work with group. Ag professor Dr. Baker is sponsor of the club.

Cost of clinical treatment to cure narcotic addiction is tax deductible. Cost of clinical treatment to stop smoking isn't. That's not good, some insist.
