THE UNIVERSITY THRUST

Operation Success

OPERATION SUCCESS is based on the philosophy that each student admitted to Prairie View A&M University has the potential to succeed.

The complete education and experiences of the student at Prairie View A&M University are designed and implemented to help them keep the status to which they were born, namely: THEY WERE BORN TO WIN! . . . THEY WERE BORN TO SUCCEED!

The University recognizes that many students, who are admitted, may have academic, social, cultural, vocational, economic, or personal handicaps.

There are no students admitted, however, with handicaps which cannot be corrected so that the student can achieve success. The students do have the potential to succeed.

OPERATION SUCCESS is based upon the philosophy that the University will organize its human and material resources into such systems that will minimize the academic, personal-social, cultural, and career awareness and vocational attainment of each student enrolled.

OPERATION SUCCESS is also based upon the philosophy that it is important for the student to enroll at the University, but it is even more important that he or she graduates from the University with a wide variety of new experiences and high level achievements.

To this end, the University will not be satisfied until at least 90 percent of those students who enroll also graduate.

ACADEMIC DEVELOPMENT
1. To establish academic achievement as the first and major priority of the students, staff, and administrators of the University.
2. To facilitate student knowledge of the programs required for their academic majors and to ensure that they follow those programs.

PERSONAL-SOCIAL-CULTURAL DEVELOPMENT
1. To facilitate student participation in a wide range of cultural, recreational, and leisure time activities.
2. To facilitate student involvement in the many opportunities provided for positive leadership experiences and to stimulate student participation in a variety of activities that provide experiences in the role of positive followers.

CAREER DEVELOPMENT
1. To facilitate student selection of career fields that are compatible with interests and potentials and to encourage them to become thoroughly familiar with other closely related career fields.
2. To facilitate student knowledge of professional qualities required of leaders in their chosen career fields.
3. To facilitate student planning of programs to develop the personal, social, and professional qualities required of leaders in the career fields and encourage them to follow their planned program.

PHYSICAL FACILITIES
1. To facilitate student care and responsibility in handling University property and their own personal property.
2. To facilitate the knowledge that damages to University property and equipment must be paid for by students. In order to keep buildings and equipment in good repair, the University has no alternative other than to raise student fees.
