E. OUR RESPONSIBILITY

More than any other time in our national history - America must depend upon Education for an enlightened people.

Democracy depends upon an enlightened public. A public which understands the deep-lying conditions and issues and can think clearly and make decisions.

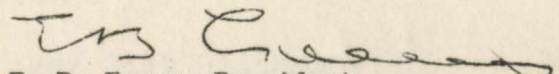

American democracy (and perhaps America itself) cannot survive with half its citizenry unable to participate and appreciate the ideals of government by the people and for the people.

Education must develop understanding, help clear away the fog of uncertainty, identify the issues and the contending forces, be transmissive - must pass on the culture, relate itself to the social life of our people more vitally and intelligently than has generally been done, like democracy - be of the people and for the people.

EDUCATION MUST POINT THE WAY

Best wishes to all of you.

Yours truly,

E. B. Evans, President
