YOUR WEEK

Dr Pierre Lecomte du Nouy and Miss Elouise Carter

Dr Pierre Lecomte du Nouy is a scientist of the first magnitude with several higher degrees which attest to his academic acumen. In less than 300 pages he has set down with remarkable lucidity goals attainable by man now that his physical evolution is nearly complete. His book, HUMAN DESTINY, is a must for those persons who are sincere in their pursuance of truth. Using the scientist's exactitude, Dr du Nouy discredits theories proposing that human life could have appeared on earth by pure chance. It is his opinion that it will be some time before men will begin to think universally; "to consider themselves as elements of humanity as a whole." Until this idea permeates our thinking, of course, peace, as we want it, is unattainable. Far from being a pessimist, however, Dr du Nouy believes that the destiny of human beings is high, and that once the minds and hearts of men are merged into a universal search for truth we shall, indeed, know peace and God.

Miss Elouise Carter found a wallet containing a sum of money in the Recreation Hall last Thursday. Extra money could probably have meant an additional new "New Look" outfit or maybe an ounce of some aromatic perfume of the "Shocking" or "Forbidden" variety. Miss Carter, however, chose to turn the wallet over to an office girl, and within less than an hour the student who lost it had been notified.

Such honesty, on our scale of observation, lends validity to HUMAN DESTINY, and though our comely Miss Carter may never have heard of learned Dr du Nouy they would understand each other - they speak the same universal language.
