Natural Science Dept. Gets \$37,520 Grant for Institute

Dr. E. B. Evans, President of Prairie View A&M College, announced that the Department of Natural Sciences had received a grant of \$37,520.00 to conduct the Sixth Summer Institute in Science for Secondary Teachers. The institute will be held on the campus from June 7 to July 18th. It will be directed by Dr. E. E. O'Banion, Professor of Chemistry, and Head of the Department of Natural Sciences.

Dr. O'Banion stated that the institute is designed to acquaint teachers with current topics and new approaches in the teaching of the sciences. Emphasis will be placed on the BSCS CHEM. and PSSC programs. Basic courses will be offered in biology, chemistry and physics. Advanced courses will be offered in biology, chemistry and physics. In addition to the regular program, outstanding lecturers in the various fields of sciences will be presented during the institute.

Selected participants will receive stipends up to \$450.00 for the six week period in addition to tuition, travel and allowance for dependents. All applications must be received by February 15th. Interested persons may secure application forms by writing the director.

Student Directory To be Compact Size

The Student Press Club has published its second consecutive Student - Faculty Directory which will be on sale soon. The new, compact-size directory will consist of complete listings and information of students and all staff members.

Listings for the directory will include campus addresses, home addresses, and majors for all students. For all staff members, home addresses and telephone numbers will be listed. To complete the listings, all general operations of the college as well as residence halls will be included.

Students, staff members, faculty, and others in the Prairie View Community are urged to purchase the new Directory when it goes on sale. Information concerning the upcoming sale can be obtained in the College Information and Student Publications Offices, Rooms B-6 and B-4, respectively in the Administration Building.

Marjay Anderson is Directory chairman and Dr. C. A. Wood is advisor.

PV Grad on Staff At Southern University

Captain LaVaughn C. Mosely, Jr. (1957) is now serving on the ROTC instructional staff at Southern University in Baton Rouge, Louisiana.

The son of Mrs. Canzetta Mosely and the late L. C. Mosely, Captain Mosely served several years in Germany before going to Southern.

"Y" Leadership Conference Convening Here Today

The Prairie View Leadership Training Conference under the direction of W. Van Johnson, Director of Student Activities, convened December 4, 5, and 6, at Prairie View A&M College. The theme of the conference is entitled "The Responsibility of the Student Leaders in Helping to Improve Academic Performance."

Dr. Horace Mann Bond, Dean of the School of Education, Atlanta University, will be the keynote speaker Saturday morning, December 5, at 10:00 a.m. He will speak on the general theme.

Dr. Bond received his Ph. D. at the University of Chicago. He has served as President of Fort Valley State College and President of Lincoln University, 1945-57.

BOY SCOUTS DINNER

The E. B. Evans' Division, David Crockett District, will hold its Annual Appreciation Dinner on December 9 in the Ballroom of the Memorial Center. All persons active or interested in Boy Scout Work are invited to attend. The E. B. Evans' Division includes communities in Austin, Burleson, Waller, and Washington Counties.

FINAL GROUP PHOTOS SET FOR YEARBOOK

Group photos will be set for Tuesday, December 8 from 1:00 p.m. until 5:00 p.m. The night schedule will begin at 6:15 in the Memorial Center. All clubs will be notified.

He has published numerous articles in magazines; four books, the latest, *The Search for Talent*.

Dr. Bond has made fourteen (14) trips to Africa, which is one of his chief current interests.

Dr. Walter Kerr, National Youth Foundation Director, native Texan, entertainer, lawyer, minister, youth worker, and a man of many talents, will speak at the banquet Saturday evening at 7:00 p.m.

Dr. Kerr is internationally recognized as one of the foremost youth leaders of our time. He was named by Governor Buford Jester as vice chairman of the Texas Training School Code Commission which made one of the most extensive studies ever undertaken on Juvenile Delinquency. Dr. Kerr's book, *Child By Child We Build A Nation*, set out the need and the legislation for the Texas Youth Development Council enacted by the Texas Legislature.

Science Profs on Lecture Tour

Five members of the Department of Natural Sciences at Prairie View A&M College have been named to participate in the visiting lecturers program sponsored by The Texas Academy of Science and The National Science Foundation.

They are: Dr. T. P. Dooley, professor of biology and Dean of the School of Arts and Sciences; Dr. L. C. Collins, profes-

Dr. Horace M. Bond

Yearbook Judges Have Tough Time Deciding 10-Most Beautiful Girls

Yearbook judges for the 1965 Pantherland had a tough time recently, when they were choosing the ten finalists in the Ten Most Beautiful Girls Contest at PV.

The judges had 25 contestants to choose from. The reason for toughness was cited as being beauty. All 25 coeds were just being graded on beauty; not even personality.

Earlier this year, when the yearbook staff decided to sponsor the contest, and include it as a major section to the yearbook, they made the decision to pick co-eds on beauty alone. The

ten most beautiful girls along with the "Cuties," another category also chosen, will be featured in the Vanity Fair section of the yearbook. The ten most beautiful girls will be pictured in color.

To begin with, the yearbook staff chose twenty-five co-eds from the 129 nominees who entered the contest. Later, members of the college staff served as judges to choose the ten finalists.

The twenty five finalists included: Florence Andrews, Anita Bradford, Latricia Brooks, Beverly Cannon, Marion Coss, Cathryn Crawford, Barbara Garrett, Barbara Giddings, Lovie Hall, Vivian Hartwell, Marie Johnson, Dorothy Lampley, Theodora Lawson, Lorealia Mason, Tobartha McDowell, Cheryl Kaye McIntyre, Gloria Neal, Jacqueline Parham, Gustie Rice, Joyce Samuel, Kate Smith, Dotsie St. Julian, Sharon Taylor, Barbara Thompkins and Joyce Vance. The names in bold print were the ten finalists.

The judges included Miss Helen Lomax, George Eaton, William Bell, Herman Selman, and William Gerald.

25 FINALISTS — These beauties are twenty-three of the twenty-five co-eds who competed in the Yearbook's 10 MOST BEAUTIFUL CONTEST.

NEWS IN BRIEF

CHRISTMAS BRIGHTEN-UP

For many years residents of the college have followed the custom of putting up displays about the homes, dormitories, and public buildings in keeping with the spirit of Christmas. This activity is sponsored by the Prairie View Garden Club and is termed — "Christmas Brighten-Up."

It is our hope that we can follow the same practice this year and that decorations will

be made sufficiently early for students to see them before leaving for the holidays, December 19. For further information, contact any member of the Prairie View Garden Club or call Mrs. L. C. Phillip, Secretary, or Dr. J. M. Corruthers, President.

Texas Principals and Supervisors Hold Conference at Prairie View

"The newness in education Today" was the central topic for discussion at the tenth annual Conference of the Texas Elementary Principals and Supervisors Association held at Prairie View A&M College on November 19-20.

The elementary school administrators group is a division of the Teachers State Association of Texas and the National Education Association.

Principal speakers for the two meetings included Dr. Lee J. Wilborn, assistant commis-

sion for instruction, Texas Education Agency and Dr. Vernon McDaniel, executive secretary, TSAT.

A special workshop session gave attention to a cooperative professional development project jointly sponsored by the Phelps-Stokes Fund and TSAT. Dr. Walter I. Murray, professor of education at Brooklyn College, Brooklyn, New York, served as visiting consultant.

Topics discussed in small group sessions were: (1) The role of the principal in interpreting the instruction program to parents, (2) Performance standards for teachers and principals, (3) New ventures in the teaching of reading, and (4) The newness in social studies.

Dr. J. W. Echols, director of teacher-education at Prairie View, serves as coordinator of the elementary school administrators group. The president of the association is James C. McClure, principal of Ralph Bunche School, Midland.

Other program participants included Harlan R. Powell, Jackson School, Corsicana; Robert Starr, McCoy-Fort Worth; Charlie Brown Franklin School, Orange; Mrs. M. O. Collins, Coalinga; Mrs. I. B. Campbell, Marshall; G. J. Mundine, Doris Miller-Houston; F. R. Rice, Blackshear, Austin; Mrs. Helen Wright, Carpenter-Nacogdoches; C. E. Tanner, Drew-Crosby; R. F. Orman, Sims-LaMarque; Harold Lange, E. W. Harlee-Dallas; Mrs. Maudrie M. Walton, Rosedale Park-Fort Worth; E. J. Dawson, Eastside-Carthage; E. L. Jordan, Booker Washington-Midland; Mrs. Ernestine Compeathers, Terrell, Denton; and Fred Batts, Hiney-Waco.

Prairie View staff members participating on the program as speakers, consultants and leaders included — Dr. E. B. Evans, principal, Drew, Brown, Murphy, Stewart, Dover; Lawson, Proctor, Phillip, Burdine, Coss, Jones, Siskley and music department staff and students.

Biology Majors To Present Forum

Several members of the department of Biology will present a forum as a part of the intellectual series sponsored by the Biology Club.

Participating on the panel will be Marion Coss - Senior; Barbara K. Jones - Senior; Marjorie Netherly - Senior; Mariav Anderson - Junior; Fernan Hoxie - Senior; Walter Tillman - Senior; and Donald Dorsey - Junior. Marion Coss will preside as chairman of the forum.

Various opportunities available to biology majors in different fields will be presented. Opportunities in Industry, Education, the Armed Services, Professional Business, and others will be pointed up by members of the panel.

The forum will be in the M. T. Harrington Science Building.

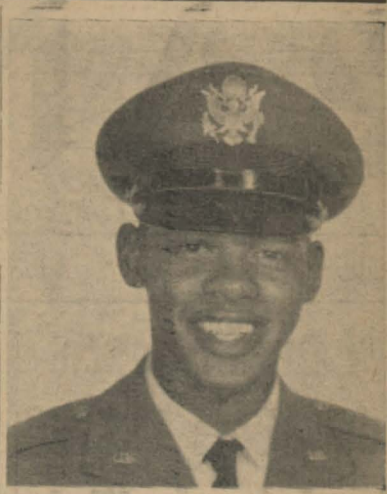

Jack and Jill Report 8-9 Group

Eight and nine year old Jack and Jillers met on the Picnic Grounds and had a hayride and weiner roast. The election of officers was held with the following officers being elected for 1964-65: President, Felecia Bell; Vice President, Willie J. Bell III; Secretary, Victoria Gerald; Assistant Secretary, Carolyn Butler; Treasurer, D. R. Butler; Parliamentarian, Peter Lewis; Reporter, Sandra Wright.

On Halloween a party was held for the group at the home of Mrs. Butler. Games were played and delicious food served. Children wore costumes.

A meeting was held on November 8th at 4:00 p.m. in the home of Mrs. W. J. Bell. It was decided by the group that each member would pay \$.05 monthly for dues. It was decided that members would meet at Mrs. B. Berry's home to decorate baskets for Thanksgiving. The baskets were decorated and turkeys were made by the group.

Members of 8-9 years olds group are: Felecia Bell, Willie J. Bell III, Glenn E. Berry, Carolyn J. Butler, Douthard Butler, Victoria Gerald, Stephen Hill, Karen Kendrick, Peter Lewis, Emiel Owens, Jr., Kymly Reid, William E. Reid, Sandra Wright. Reporter: Sandra Wright; Sponsors: Mrs. W. J. Bell, Mrs. D. R. Butler.

George Heren

PV Grad is Commissioned

George R. Heren, son of Mrs. Lovey Heren of 124 Shawnee St., Nacogdoches, Texas, has been commissioned a second lieutenant in the U. S. Air Force upon graduation from Officer Training School (OTS) at Lackland AFB, Texas.

Lieutenant Heren, selected for OTS through competitive examination, is being assigned to an Air Force Logistics Command (AFLC) unit at Brookley AFB, Ala., for duty. His unit supports the AFLC mission of providing Air Force operational units with supplies, equipment and maintenance services.

A graduate of E. J. Campbell High School, the lieutenant received his B. S. degree from Prairie View A&M College.

Survey Reveals Facts - Why I Came to College

by Ulysses H. Simmons

The United States Office of Education reported that in 1963 there were over 4,207,000 college students enrolled in 2100 colleges and universities in this Country.

Thirty-two of these many college students of Prairie View Agricultural and Mechanical College of Texas have listed their reasons in this limited study.

The purpose of this limited study was to point out or to indicate reasons why thirty-two students enrolled in Education 313 - Elementary School Curriculum came to Prairie View College.

These students are under the dynamic leadership of Miss Dorothy I. Burdine.

The instructor simply asked the students to write a brief statement explaining their reasons for coming to Prairie View College.

Thirty-two students executed this brief assignment. The students were asked not to write their names on the papers which means that their identity and sex could not be easily detected.

The following categories or items were set up to aid in the following tabulation and findings:

Categories — Reasons, No. of Students Responding	
1. For economic reasons	18
2. To help parents to better their conditions	28
3. Influenced by parents and others	4
4. To socialize and improve personality	1
5. To learn a vocation and benefit from higher education	15
6. To serve the community and the nation	6
7. To learn how to rear a	

- family 1
- 8. To develop respect for others 1
- 9. To change environment and become a part of a selected group 2
- 10. To find a spouse 1

Each of these thirty-two students listed from one to five reasons why they came to college.

Of the thirty-two students, twenty listed the reason of economic and security as their first choice or reason.

The next highest amount of reasons indicated a strong desire to economically help parents to better their conditions.

Fifteen students pointed out that they came to college to learn a vocation and profit from higher education.

The following four reasons indicated the very significant:

One student came to college to socialize and improve personality aspects and another student came to college to change environment and become a part of a selected group.

Another student came to learn how to rear a family and the final and lonely reason was given, which precisely indicated, that "I came to find a spouse."

These thirty-two students would like to ask the entire student body of this great institution this same question—"Why did you come to College?"

Whatever our reasons are let us get busy to make a worthwhile life for ourselves and assist others to make our community, nation and the nations of the world a better place in which to live.

Employment Seminar to be Held

A Southwest regional seminar on equal employment opportunities, originally scheduled in Dallas for Sept. 15, will be held Feb. 11 in the Marriott Motor Hotel.

The meeting is being sponsored by Southern Methodist University and the Plans for Progress program of the President's Committee on Equal Employment Opportunity.

Plans for Progress is a cooperative program intended to provide leadership in achieving equal job opportunities. It currently includes more than 278

major corporations, employing

James Anderson
Engineering Prof
Presents Paper

James A. Anderson, Sr., assistant professor of Electrical Engineering at the college, presented a paper entitled "A PIN Diode Variable Attenuator" at the Mid-American Electronics Conference held recently in Kansas City, Missouri.

A native of the Prairie View community and a 1963 graduate of the college, Mr. Anderson was the recipient of a Frank Rogers Bacon Fellowship in Electrician Engineering at the University of Wisconsin, where he received the M. S. degree.

The School of Home Economics at Prairie View A&M College has announced its tenth annual observance of Nutrition Week on December 1-3.

Dimensions in Nutrition — space nutrition, international

more than 8 million persons.

Purpose of the meeting, explains Mr. G. H. Scott, general chairman of the seminar, is to assist industry in Texas, Louisiana, Arkansas, Oklahoma, and New Mexico in understanding and implementing the economic and moral objectives of the President's Committee. He added that SMU is co-sponsoring the one-day seminar at the request of local and regional industry.

"Similar conferences have been held for regional industries in Providence, R. I., Washington, D. C. and Los Angeles, Calif.," he said. "This is the first such conference to be held in the Southwest."

Hobart Taylor, Jr., Associate Counsel to the President and Executive Vice President of the President's Committee, pointed out that the conference hopes to make the various communities in the five state area interested in working on constructive pro-

Nutrition Week Observed

nutrition, and the anti-poverty program has been selected as the theme for the week's observance.

Dr. Annabelle Spann Sherman, a member of the President's Task Force on the War

jects with Plans for Progress firms and to encourage small businesses and other companies not on Plans for Progress or other Committee programs to work in promoting equal employment opportunities.

Serving with the general chairman, George Scott, Director of Corporate Industrial Relations for Ling-Temco-Vought Inc., are the following co-chairmen: Dr. Keith Baker, Vice President of Southern Methodist University; G. A. M-Lellan, administrative director of the Plans for Progress program and director of personnel services Olin Mathieson Chemical Corp.; Dr. Marvin H. Berkley manager, corporate personnel, Texas Instruments, Inc.; John D. Mitchell, director of industrial relations, Collins Radio Co.; Wayne A. Warthen, controller, American Airlines; Jack Summers, supervisor of employment General Motors Corp., Arlington.

Against Poverty, will serve as guest speaker at the initial program for the observance scheduled on December 1 at eleven o'clock. Dr. Sherman, on leave from her position as associate dean of the school of agriculture and home economics at South Carolina State College, will speak in the ballroom of the Memorial Center.

She is also scheduled to discuss informally the Anti-Poverty program with members of the Executive Cabinet, the home economics faculty, extension home economists, and student representatives for home economics organizations. In addition, she talked with senior students interested in VISTA (Volunteers, In Service To America). All seniors, irrespective of major, are invited for this session.

International nutrition will be spotlighted through a film entitled "Hungry Angels" and a panel discussion by foreign students on Thursday evening, December 3.

Throughout the week exhibits relating to protein malnutrition, international health organizations and space nutrition will be on display in the Home Economics Building and Memorial Center.

Accent on Health — Food Poisoning

Salmonella may sound like the name of a fish, but it's really a class of bacteria which can cause food poisoning.

If you've ever had salmonella-caused food poisoning — and your chances increase every year — you'll not forget the name.

A nationwide incidence of 9,680 cases were reported in 1962, the last year for which accurate figures are available.

Infections from salmonella are acquired usually by eating or drinking contaminated food or drink.

The foods most often implicated are poultry, eggs, milk, prepared meats, sausage, meat pies, dried coconut, cake mixes and custard-filled bakery products which are lightly cooked and subject to much handling. Animal foods and fertilizers are also a possible source of infection.

Effective control of salmonellosis requires the cooperation of physicians and health officials, veterinarians and wildlife experts, farmers and industrialists and, especially, the public as a whole.

As one means of prevention, your health department sponsors schools for food handlers, and employs trained sanitarians to make routine inspections of food handling establishments.

But this is only a small part of the story. Adequate cooking of food is one of the most practical methods of preventing salmonellosis. Food which is to be held after cooking should be kept under refrigeration or else kept hot. Food which is "just warm" and held for a period of time allows the bacteria to multiply, thus enabling them to cause infection.

Refrigeration prevents the bacteria from multiplying but will not kill them. Foods of animal origin should be purchased from sources which come under official inspection. This is evidenced by a stamp or printed legend on the product.

Use sudsy water and disinfectants to eliminate the bacteria from your work area and eating utensils.

These precautions may sound like just so much trouble, but just ask anyone who has ever had salmonella and he'll tell you it's more than worth while.

(A weekly feature from the Division of Public Health Education, Texas State Department of Health.)

December 8, 1903 — Professor Samuel, secretary of the Smithsonian Institute failed in his second attempt to fly an airplane constructed according to his own plans. (Eleven years later the Langley machine was re-tested and successfully flown.)

Uncertain about these career decisions?

- a. Join a large company? () or medium? () or small company? ()
- b. Prefer to work in systems analysis and techniques? () or on equipment design? () or multi-unit large systems? ()
- c. Aim to be a Technical Specialist? () or Administrative Manager? () or Program/Project Manager? ()
- d. Have an advanced degree in your sights? () or feel BS is sufficient for satisfying career growth? ()

Don't worry!

For those graduates who are uncertain regarding their career plans, we welcome the opportunity to discuss the wide variety of interesting and challenging assignments available with Sylvania Electronic Systems. SES is equipped to foster the professional growth of graduates with widely differing goals. This is possible primarily because SES is actually a highly diversified complex which encompasses 19 R&D laboratories, 4 manufacturing plants and a world-wide field engineering operation. The Division's mission is to manage government systems programs for General Telephone & Electronics, the parent corporation.

The small group form of organization — a traditional small company advantage — is practiced at SES to encourage individual progress and development. SES offers its personnel absorbing assignments to perform, yet also affords a bird's-

eye view of the total picture in advanced electronics.

A wide variety of current in-house projects enables you to move right into the heart of today's most advanced developments in electronic systems. You may start here in a technical or administrative capacity in any one of these broad areas: space/earth communications • electronic reconnaissance • detection • countermeasures • information handling • arms disarmament and control • sophisticated electronic networks such as the ground electronics systems supporting Minuteman command and control functions.

Finally, opportunities are numerous for ambitious individuals to accelerate their advancement through participation in division-wide conferences, in-plant courses and seminars, and post graduate study plans conducted on an unusually generous scale.

SES LABORATORIES ARE LOCATED SUBURBAN TO SAN FRANCISCO, BUFFALO AND BOSTON
For further information about any of these locations, see your college placement officer or write to Mr. Robert T. Morton

EDITORIALS

Congratulations, Panthers!

The Panther staff wishes to congratulate the Prairie View Panthers on their outstanding victory culminating their 1964 season. Inasmuch as this is a repeat performance identical to that of last year's, the entire student body is just as much elated.

Undeclared in 25 out of their last 26 games, Coach Billy Nick's squad is expecting to be named for the second year in a row, the mythical champions among predominantly Negro colleges of the nation.

Despite their spotless record, the Prairie View team will play in no post season game this year. The Panthers are on probation with the NCAA which prohibits them from accepting a bowl bid. However, PV is still proud of their team!!

The Panthers were ranked number 5 by NAIA this year, missing very closely another bid to participate in championship play off games sponsored by this organization.

Again, congratulations PANTHERS — and thanks for a job well done!!

Creator of Understanding

As we all know, the jet age has shrunk the globe. Now we can go almost anywhere in the world in a day or less. And we can go in complete comfort, surging along at speeds which would have seemed the figment of wild imaginations not so long ago.

This, the experts tell us, is only the beginning. Before long, as time is measured, supersonic transports will cross from this country to Europe in something like two hours. There are technological problems involved — notably, the sonic "boom" created by faster-than-sound flight — but they will be solved.

The tourist, the student, the businessman — all who move about the world for whatever reason — are the beneficiaries of all this. But there is much to the picture. As the number of jet-age travelers increases, ignorance of the traditions, desires and attitudes of other peoples diminishes. Suspensions are dispelled by new international friendships. And so, little by little — as water wears away stone — we may confidently expect a release of tensions and a broader and sounder basis on which to build true world peace.

The airplane has often been an instrument of terrible destruction. But now its main role, in the international sphere, is that of a creator of understand-

ing. And that is a great role indeed.

Vice Presidents Are VIPs

Although the United States has never lacked a President since George Washington was inaugurated, 20 per cent of the time it has lacked a Vice President, the Chamber of Commerce of the United States reports.

Since John Adams became the first Vice President in 1789, the office has been vacant on 16 occasions. Eight Vice Presidents succeeded to the presidency. Seven Vice Presidents died in office. One Vice President resigned (John C. Calhoun of South Carolina in 1832 to enter the Senate).

As Vice Presidents are chosen only in the quadrennial national elections, the office has been vacant 38 out of 175 years.

Many persons are convinced that under recent Presidents the work of the Vice President has become extremely important, whereas before it was not. Several methods have been suggested to fill the office when it becomes vacant between national elections. It has been suggested that a new Vice President be picked by the President, be picked by Congress, or by

Quick Facts About Our Student Government

The PURPOSES of the Students Association of Prairie View A&M College shall be: (1) To promote better citizenship among its members through the development of knowledge, skill and understanding self-government and responsibility. (2) To promote the general welfare of the students of the College with particular concern for personality and character growth. (3) To make recommendations to the President of the College in those matters which vitally affect student life.

The FUNCTION of the Students Association: (1) To represent the student body in all of its relations with the administration, faculty, alumni and other groups and on all special occasions with consent of the President of the College. (2) To recommend the appointment of

all student delegates who represent the College at meetings where no special campus organization is concerned. (3) To recommend a list of eligible students for certain collegewide committees. (4) To assist in planning and executing the Freshman Orientation program. (5) To propose a program and to play a key role in implementing the student activities program and budget which the Dean of Students approves each year. (6) To recommend a system of privileges and disciplinary procedures to the administration of the College for consideration and approval. (7) To conduct at least one chapel program per semester. (8) To adjudicate and impose student discipline in designated cases and subject to the review of the personnel deans and President of the College.

The Great Society

by Joan Derrough

With the election polls long ago closed and the announcement of a new President of the United States now a part of a four-week history, we look to the president - Lyndon Johnson - as the guiding hand, the individual with all the answers, in so many words, as "our deliverer." In more sober moments, it is quite obvious that a President of the United States is yet a man of limited facilities and abilities; most instances however find us realizing him as heretofore described; "the answer to all problems."

But like John F. Kennedy and his New Frontier, Johnson has initiated The Great Society, a master plan aimed at providing abundance and liberty for all. Johnson invisions The Great Society that will be a place where men are concerned with quality of their goals than the quantity of goals. A place where every child can find knowledge to enrich his mind and enlarge his talents, "a place where the city of man serves not only the needs of the body and the demands of commerce, but the desire for beauty and the hunger for community". But most important of all The Great Society is not a final objective or a mere finished work rather, "a challenge constantly renewed beckoning us toward a destiny where the meanings of our lives matches the marvelous products of our labor".

This master plan aims basically at three areas where concentration of the Great Society rests: (1) our cities (2) our countryside (3) our classrooms. American cities of today are decaying due to insufficient housing or sub-standard hous-

ing, conglomerated traffic, unrestrained expansion which tends to abolish community life. Crime and Vice too are greatly reducing the American city to the American slubs. These features and many more are considered and plotted against in The Great Society. Provisions for better housing, recreating and community life are enumerated.

With respect to the countryside, one needs only to take a drive along our highways, to notice the roadside parks, lakes, seashores to realize the imminent need for a clean-up job. A "beauteous America" is in danger. Even our drinking water and food are threatened with pollution.

The third place at which the Great Society is aimed is the classroom. All three phases are greatly important. But the classroom efforts will be aimed at shaping the lives and minds of the future leaders of our nation. In this respect the "master plan" aims at providing adequate classrooms, modern curricula and qualified teachers, and educational system that will stimulate the love of learning and creating in all aspects of living. Too, a strike against poverty as an excuse for illiteracy is included as a prime purpose.

Herein lies the basic analyzation of Johnson's "Great Society." It most definitely has its merits but obstacles are numerous. This goal cannot be reached in a year, two years or

Thrash-Out

Thrash-out made its first appearance in the last edition of the Panther. Since that time many interesting responses and views have been made known to the editors of the column.

Question: Why didn't the PANTHER staff have no pertinent information to the issues that were presented last edition?

ANSWER: It is presently the policy of the staff to investigate both sides of an issue before making a statement pro or con for the case. Since the staff had not contacted the other side of the controversies last mentioned, it was in no position to give an answer or opinion.

Question: What now is being done about most of the controversies mentioned last edition? Are they just going to be ignored?

ANSWER: The controversies were of a very critical nature and can't just be ignored. The Student Council is instrumental in airing all these problems at designated Council meetings. As soon as the Council meets the PANTHER will report the findings and judgments of each of the cases in question.

Just Thinking

Big pleasures and great happiness are but the consummation of many little pleasures and deeds of kindness bound together, as a loaf of bread is many crumbs in the aggregate. Happiness is the art of finding joy and satisfaction in the little privileges of life; a quiet hour in the sun, instead of a farway journey; a little outing in the nearby woods, instead of long trips away; an hour with a friend, instead of an extended visit with relatives; a few pages of a book, instead of hours of reading at a time; a flash of sunset, a single beautiful flower, a passing smile, a kindly word, a little gift bestowed anonymously, a little thoughtfulness here and there as the days slip by. These are the crumbs of happiness. Do not despise them, lest when the evening find you, you be a-hungered and disconsolate.

—Anon.

even the next four years of administration. Rather because our government is the reflection of the people it serves the choices that we personally follow, the battles that we wage, the contents that we personally join will finally decide the real character of this country.

the Electoral College.

A compromise method that seems to have the best chance of acceptance would let the President nominate a Vice President subject to confirmation by majority votes of the House and Senate.

The Senate Judiciary Committee this summer approved a proposed Constitutional amendment which among other things would set this compromise method as the one to be used in filling the Vice Presidency between national elections. The proposal probably will be brought up again in the next Congress. If both the House and Senate approve it by two thirds votes and three fourths of the states ratify it, it will become part of the Constitution.

ROTC Trains New Army Officers

Reliance upon the Reserve Officer Training Corps as a source for junior officers is greater now than ever before. In the past the ROTC program has been the most productive source of commissioned officers for both the regular Army and the reserve components. These two facts of military life are pointed up as the Fourth U. S. Army prepares for the newly signed Reserve Forces Vitalization Act.

A total of 1,500 newly commissioned second lieutenants from schools in the five-state Fourth Army area join with more than 11,000 others in the nation's graduating class of 1964 to fill 85% of the required annual input of junior officers in the active Army. Five hundred West Point graduates and 10%, or more, of the ROTC graduates of 1964 will become career Army officers and furnish the hard core leadership for the future.

President Johnson, in signing the new bill, commented that the ROTC has become a familiar adjunct to America's education system and has trained many thousands of our young men in the leadership so necessary to victory in the three major conflicts in which the nation has been engaged during this century. He added that the bill brings about a marked improvement in the ROTC program now being conducted in colleges and universities and will open the ROTC to many young men who have been unable to qualify before.

The roots of the ROTC program reach back more than a

Atlanta Council on Human Relations, Georgia Council on Human Relations, Atlanta Negro Voters League, and the Advisory Council of the Danforth Associate Program - Danforth Foundation.

Dr. Newsome has recently been appointed by Secretary of Labor Wirtz to the National Defense Executive Reserve. He has also been appointed by Georgia's Governor Sanders to the Commission to Improve Education in Georgia.

The journalistic endeavors of Dr. Newsom include "An Exchange of Taped Discussions Between Students of Negro and White Colleges" in *The Speech Teacher*, November, 1962 and "A Stormy Rally in Atlanta" in *Today's Speech*, April, 1963. He has also done several book reviews.

Dr. Newsom has been a life member of Alpha Phi Alpha since 1949 and has served in various official capacities locally, regionally, and nationally, his most recent accomplishment being elected General President.

A reception will immediately follow the services in the Memorial Center Ballroom.

PV Coeds to Attend Region XII ACU Meeting

Three Prairie View coeds will attend the Region XII Convention for the Association of College Unions during the weekend of December 10, 11, 12. These coeds are Mamie Tughes, Marjay Anderson and Alberta E. Soders.

The Region XII Convention is convening this year in Dallas, Texas at Southern Methodist University. The region is composed of colleges and universities in Texas, Louisiana, and Mississippi. In the discussions and workshops the students in

attendance at the convention undertake to discuss problems involving union activities. These discussions help the union leaders to formulate new ideas for the betterment of their own particular college union programs.

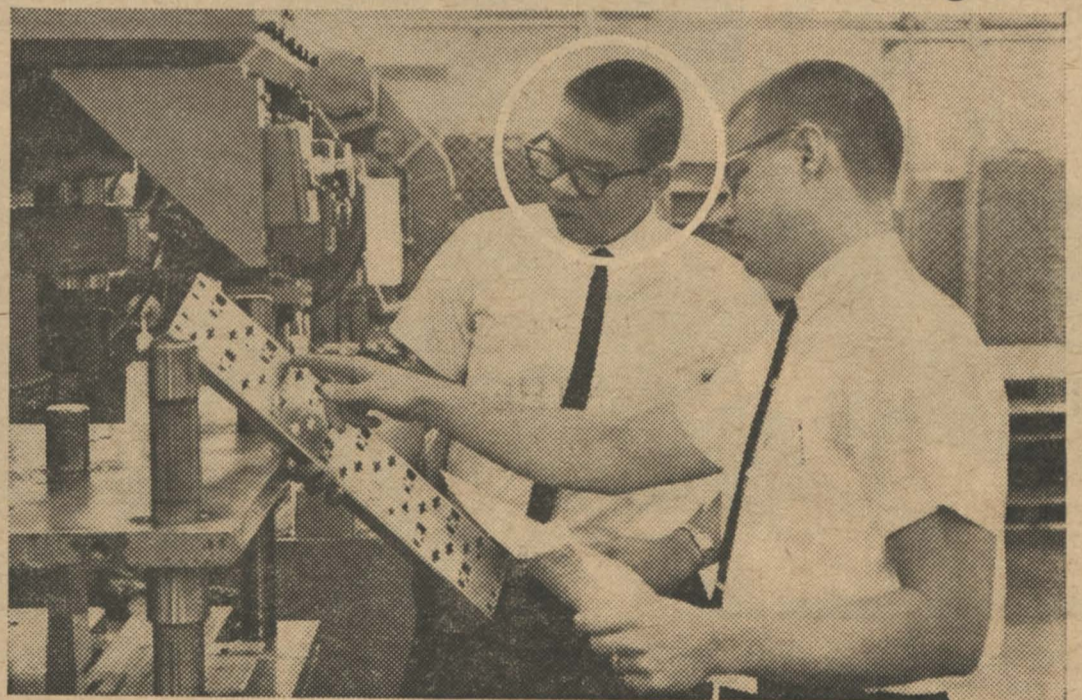

The coeds attending the convention were drawn from the student leaders and are connected with the union functions and program. Mamie Hughes, a Senior English major is chairman of the Memorial Center Advisory Committee. Alberta E. Soders, a Senior Biology major and

President of the Biology Club, and Business Manager of Club 26, is a member of the Advisory Committee. Marjay D. Anderson, a Junior Biology major, member of pledge Club 13/26, and Editor of the *Panther*, handles publicity.

The delegation will attend the convention with the hope of gaining new information concerning the trends and progress in union programming and activities. Miss Hughes will lead the discussion on "Games and Recreation."

Don Holt sought a career with a challenge,

so he joined Western Electric.

Don Holt came to Western Electric right after he earned his B.A. degree from Lincoln University (Missouri) in 1962.

Western Electric looked carefully at Don's interests and college record. We assigned him to an important 10-man Engineering Research team which had been created to develop and implement a computerized production control system.

After this 18-month assignment, Don became a production control analyst. In this capacity, he is responsible for analyzing drawings, specifications, and shop capacities relating to the ability of one of W.E.'s newest plants to manufacture a wide variety of complex metal parts.

The opportunities for advanced study were also important in Don's decision to join W.E. There are

numerous management courses available as well as a Company-paid Tuition Refund Plan. He is happy with his progress and sure that Western Electric was the best choice.

And you?

If you set the highest standards for yourself, enjoy a challenge, and have the qualifications we're looking for — we want to talk to you! Opportunities for fast-moving careers exist now for physical science, liberal arts and business majors, as well as for electrical, mechanical and industrial engineers. For more detailed information, get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. And be sure to arrange for an interview when the Bell System recruiting team visits your campus.

LIONEL HAMPTON — The "King of the Vibes" really stomps it out during a recent appearance at Prairie View.

SCENES FROM "A MIDSUMMER NIGHT'S DREAM" — Charles Gilpin players performed excellently in their fall play production under the direction of Mr. Horace Bond.

Gilpin Players Climax English Emphasis Week

The Charles Gilpin Players under the direction of Mr. Horace Bond presented "A Midsummer-night's Dream" by William Shakespeare as a culmination to English Emphasis Week. The play was presented in the Gymnasium-Auditorium on the 23rd of November.

No play composed of such a variety of elements achieves a more satisfactory structural blending as does "A Midsummer-Night's Dream." Four plots are in progress throughout the play, each intersecting the other at some point. The Theseus-Hippolyta plot opens the play and announces the over-all theme of love and marriage. The conflict arises from the Demetrius and Helena-Lysander and

Hermia plot. The tangled chain of their love life can be divided into a number of phases: Before the play opens: Demetrius loved Helena and Lysander lover Hermia. When the play opens: Demetrius loves Hermia, Lysander loves Hermia, and Helena is forsaken. Then later in the play: Demetrius loves Helena, Lysander loves Helena, and Hermia is forsaken. Then comes the final corrective change which reproduces the first situation. In Pucks Words: Jack shall have Jill; Nought shall go ill. The transformation of the lovers is brought about by the magic of the fairy plot and the play ends on a comical note supplied by Peter Quince and his crew of "rude mechanicals."

Character casts and personalities are as follows: Theseus, Duke of Athens - Leroy Miller; Egeus, father of Hermia - Larry James Eaton; Lysander, in love with Hermia - William H. Stickney; Demetrius, in love with Hermia - Charles H. O'Banion; Philostrate, master of the revels - Nolan Ward; Quince, a carpenter - Floyd Guidry; Snug, a joiner - James Bean; Bottom, a weaver - Lorenza Phillips; Flute, a bellows-mender - Larry Eaton; Snout, a tinker - Herman Jones; Starveling, a tailor - Edwin Gibson; Hippolyta, betrother to Theseus - Antoinette Gibson; Hermia, Daughter to Egeus, in love with Lysander - Edna C. Bean; Helena, in love with Demetrius -

Orchids and Onions

Here we are again and boy oh boy, do we have lots of orchids to bestow upon those who merit them. We've had a hard day's night, and we've been working like dogs but nothing can dampen our spirit because we are out to SEE and not BE SEEN!! How about that?? It there any doubt in your feeble minds that we weren't everywhere?? Well, to show how wrong you are, Here goes!!

ORCHIDS: —Millions of the most luscious, beautiful, biggest, and sweetest smelling orchids definitely go to the most powerful team around, the mighty PANTHERS. With a season record of 9-0, our team reigns as the Southwest Athletic Conference champs for the second consecutive year. Congratulations Panthers, and thanks for a job well done.

ORCHIDS: Billions upon billions of orchids go to all of you who didn't fail to miss a single game here at PV and also when the team played away. You have up some school spirit and we hope it will continue throughout the year.

ORCHIDS: Again and again many orchids go to the exciting and colorful campus pledge clubs who persistently render their fabulous support at the pep rallies and games during the fantastic season. We'll be seeing you at the upcoming basketball games we're sure without a doubt.

ORCHIDS: Choice orchids are bestowed upon the lovely MISS PV and her equally beautiful court. These young ladies really showed that PV spirit at games at home and away.

ORCHIDS: Orchids at this time go to the BASKETBALL team captains and the team. Our team is destined to do big things this year.

ONIONS: Yes, we have some onions saved especially for those who act as if they aren't PV-ites. If you missed your first chance, well, you still have time to perk up and be proud you go to Prairie View. O. K.? O. K.!

So, it ain't as long as it has been; and it ain't as short as it's gonna get! So bye-bye for now!!

Attention Students

Do you have a hidden talent which you wish to display? Well, here is your chance. You can now participate in the A. and M. University 14th Annual Intercollegiate Talent Show which will be held on March 5, 1965. It is composed of outstanding collegiate talent representing various colleges and universities from Texas, New Mexico, Oklahoma, Louisiana and Arkansas.

What are you suppose to do? Well, each individual interested, go by the Student Activity Office and leave your name and talent.

There will be a preliminary audition held on January 8, 1965 for Prairie View Students, then the Talent Committee of A and M will audition and select all talent when they make their tours to interested schools.

Each group or person selected

to appear on the show will be provided with travel pay, amounting to three cents per mile, lodging and meals while on the A and M campus.

Sound interesting? Well, it is interesting so come on all you talented people and let's see what you can do.

ROTC

CONTINUED from Page 5

century when the Morrill Act of 1862 required the land grant colleges to offer courses in military training. The National Defense Act of 1916 established the ROTC as we know it today. The ROTC made its greatest contribution in the Army's mobilization of 1940 and 1941. Of some 100,000 members of the Officers Reserve Corps available for active duty in the summer of 1940, about 60,000 were relatively recent ROTC graduates. Most of them, together with the banner class of 1941, were called into active service before the Japanese attack on Pearl Harbor.

During World War II more than 100,000 ROTC graduates served as commissioned officers of the Army, and at least another 7,000 in the Navy and Marine Corps. A survey of five divisions in 1941 disclosed that three-fourths of their captains and majors were ROTC graduates.

The new act permits the establishment of new two-year senior ROTC program in addition to continuing the traditional four-year programs. It provides for an advanced course retainer pay of not less than \$40 or more than \$50 for a period not to exceed 20 months. It will allow qualified students at institutions, such as junior colleges, that do not have an ROTC unit to be enrolled in the program at institutions with a unit. It also permits the Army and the Air Force to award scholarships comparable to those which have been authorized for the Navy since 1947 under the Holloway Plan. Up to 5,500 scholarships for each of the three services are authorized but a limitation of 4,000 each for the Army and Air Force is imposed for the first four years the legislation is in effect. The scholarships provide for payment of tuition, fees, book costs, laboratory expenses and provide that the cadet be paid \$50 per month during the period of enrollment.

PV Grad Receives Medical Scholarship

Mr. Bernard Johnson, the son of Mr. and Mrs. C. H. Johnson has received a \$1000 scholarship from the National Medical Scholarship Foundation.

Mr. Bernard Johnson received the B. S. degree in biology here and at the present time is in the junior year at the School of Medicine, University of Kansas, Kansas City, Kansas.

December 24, 1912 — This Christmas Eve in San Francisco was highlighted by the dramatic appearance of the Italian coloratura soprano, Luisa Tetrazzini, who appalled opera lovers by stating that she would rather sing on a curbstone in San Francisco than in the finest opera house anywhere in the world. Good as her word, the opera star, at midnight, began an impromptu open air concert at the city's famous Market Street.

Rachel Terrell; Oberon, king of the fairies - Oliver Brown; Titania, queen of the fairies - Jewel L. Jenking; Puck, or Robin Goodfellow - Marie Mosley. Peaseblossom - LaVerne Bates, Cobweb - Yvonne Ricks; Moth-Joyce Samuel; Mustardseed - Florence A. Andrews. Musicians - Marion Jones, Willie Taylor, Robert Sanders, Hernandez Jackson, Patricia Blanton.

Dr. A. L. Campbell is Head of the department of English.

CLUB TALK

Club 26

K O B

Thanksgiving with all its splendor, joy and pleasant incidents remain only as a part of our memory. However the ladies of Club 26 and their noble brothers Club Crescendo had an even more enjoyable Thanksgiving due to the goodwill they had spread. As you are well aware there was a "Horn of Plenty" Dance given November 20, for the dual purpose of providing needy families with food for the holiday and adding to the most worthy Band Uniform Drive. In both respects we were most successful. More than ten families benefited from the canned goods received and the Band Uniform Drive was increased by another suit. Of course, students of Pantherland we could not have done it without your support. We are certain that you will be most proud to have participated in such a successful endeavor. THANK YOU.

We wish to acknowledge the fact that 26'er Elsenia Soders and 13'er Marjay Anderson are to attend a conference of the Association of College Unions at Southern Methodist University in Dallas December 10th-12th. A pleasant bon voyage to them.

With this we will see you next time. In the mean while be sure and keep an alert eye on Club 26. We have loads of surprises and projects for you.

Reporter, Joan Derrough

LBL Chatter

Welcome back, fellow PV-ites, from a well deserved and I'm sure a well spent Thanksgiving holiday week-end.

The LBL Corner is a little quiet for the time being, but that's O. K., things will be jumping pretty soon.

Before we left for the holidays we had a call meeting, offered our best wishes to each other, discussed our business, then went our separate ways.

Now we're back again, one for all; all for one.

Tuesday night our LBL-LBA Potentials along with the rest of us, attended the first basketball game of the season, also the first in the new gymnasium, oops! I mean Field House. Anyway, we were there to lend our support to our precious Panthers. We are proud of them and we all feel that they did a wonderful job. Keep up the good work fellows, things will get better. Is there any doubt?

Well, gotta run now, but we won't be gone long. See ya' next week, some time, same place. O. k.? You bet!

Hold Me

Hold me divinely
As silvery sockets hold stars in the sky.

Hold me celestially,
As stars faces hold sun light as they sail so high.

Hold me wonderfully
As the moon florescence beams hold the night enchanted,

Where lovers stroll,
And are held together by the sweet command of love.

Hold me dearly
As the night hold the mighty, the weak,

And the strong men asleep
In sweet dreams.

Daniel Kirkwood

December 20, 1880 — The first part of New York's Broadway to go up in electric lights was the section between 14th and 26th Streets.

Biology Club

The Biology Club met November 6, 1964 and discussed plans for selecting a biologist of the month. This person will be a senior majoring in biology.

At the next meeting of the Biology Club, a forum on careers in the biological sciences will be given by several biology majors. This will help to enlighten the students on career opportunities in the field of biology.

Various committees have been formed in order to decorate the showcase in the science building.

Club 13-26

Pledges for Club 26 during their last meeting formally set up the 13/26 Pledge Club. Officers elected were: BEVERLY THOMPSON, President; PATRICIA MAYFIELD, vice-president; DOROTHY LAMPLEY, secretary; GEORGIA PETTY, assistant secretary; MARY HILL, treasurer; LINDA BARTON, business manager, JOAN DERROUGH, reporter.

We are extremely proud of our Big Sisters and would like to take this opportunity to express our delight and admiration for their choice of club uniforms. Certainly you agree that

L B A

Members of culturally elite Les Beaux Arts Cultural Club are very much assured that the inhabitants of Pantherland are back from a joyous Thanksgiving Holiday and are more eager than ever to again pursue their studies.

As for upcoming plans for members of Club Les Beaux Arts and for Prairie View in general, there is a lot in store as far as activities are concerned. Club Les Beaux Arts will sponsor their Annual Toys for Tots Drive soon. All campus and community personnel are urged to support this worthy cause. Next, Club Les Beaux Arts will

the sweaters are too lovely for words. You look beautiful Big Sisters!!!!

hold their Annual Christmas Dance which promises to be better than ever. So look forward to it!!

Club Les Beaux Arts wishes to congratulate the Panther football team on their recent undefeated, untied season. Success is also wished to the members of the Basketball team for a very prosperous year.

In addition, Club LBA is proud of its own aggregation and the fine job it did participating in Intramural Football Games.

Last but not least, a word for the pledges who have chosen LBA as their goal — KEEP ON PUSHING!!

December 25, 1818 — The popular Christmas carol "Silent Night, Holy Night," composed the day before by Franz Gruber, was sung for the first time at Oberndorff, Germany.

Chew's Corner

Dr. George Stafford
by L. C. Chew, Jr.

Entered Prairie View A&M College as a raw bone academic minded athlete by way of Woodson High, Abilene, Texas where he stood out like a barbers' sign, he lettered in all the sports Woodson High offered boys (4) and also finished as salutatorian of his class.

Dr. Stafford had two objectives when he enrolled at Prairie View, (1) to get an education, (2) to play in the Cotton Bowl. However he went far and beyond those two. To name a few the ex-Panther lettered (4 years at Pantherland as a tackle) was selected captain and All-conference two consecutive years in addition to placing himself on the Dean's list (honor roll), the student body chose him as Mr. Athlete and the team selected him the M. V. P. - most valuable player his senior year.

Prairie View, Cornell University and athletics have acquainted Dr. Stafford with many wonderful memories. teammates, opponents and friends he recalls well. Dr. T. R. Solomon's coaching contributions, teammates Dr. Emory Owens, professor of agriculture: Lucious Davis, Post Master both of Prairie View; Dr. James Tucker, Head Business Dept., North Carolina College; Lloyd E. Scott, Bank of America's Trust Dept., San Francisco; Henry "Tackle Lowing" Warren, Chief of Juvenile Dent., Los Angeles; Dr. Stanley "Glue Fingers" Stain; Robert "Bob" Dorsey, Chief Research Engineer, Michigan (Ohio State U. All-American after leaving Prairie View. Dr. Stafford played baseball with the St. Louis Cardinals Manager. Red Schoendienst. His friends consist of Mel Whitfield and the unconquerable Bill Russell. He recalls some familiar names caused the Panthers trouble, the one we all are familiar with is Dr. Wayman T. Dever, Education Department, Prairie View A. and M.; Henry Carroll, San Antonio, Texas; James Harris, Edna, Texas; John Tensley and Winston Lee, Houston, Texas.

Coaching is no stranger to this Cornell University grad., he spent six (6) years at Brenham, Texas. We asked Dr. Stafford about "Hoss" Cartwright as a tackle, quote "He is a tremendous tackle except his ball carrying is no comparison to that of mine, the last game of my career against Southern University, I took a lateral and scored (85) yards away."

Basketball Roster

Following is the name, height, weight, hometown, class, and position:
Manning, Guy, 6'6", 210, Oakwood, Jr., C.
Greene, Stonell, 6'5", 200, Quitman, Jr., F.
James, Tommy, 6'5", 180, Houston, Fr., F.
Warren, Roger, 5'9", 159,

by L. C. Chew, Jr.
Freshman, sky jumping, Tommy James, scored the first basket in the Panther's new dome field house; but Oklahoma's Tommy Pettit scored the last, which proved defeat for the young Panther basketball team. The Panthers finally went ahead before intermission after the lead exchanged nine times. Big Guy "Turk" Manning's hot hand and the consistent out side shooting of Tommy James gave

the Panthers a 46-45 half time lead. with 17 and 11 points respectively.

Langston remained within the striking distance until the 3rd quarter and from there on they were not headed. The Panther's little pair guards, Roger Warren and new comer, Danny Hines moved the Panther with two points with 9:36 to go, however with 5:01 remaining, Pettit continued his blistering pace and moved the Lions 5 points ahead, a lead they never gave up until 1:53 of play, two jump shots by Warren and Manning only cut the lead to four points because Bill Gay and Pettit scored 3 and 4 respectively.

Co-captain Stonell Greene's bucket cut the lead to 2, and with 13 sec. to go cool freshman Danny Hines sank two freebies to knot the scores but within 7 sec. Pettit rumped in a 25 footer to put the Lions ahead 91-89. The Panther's called time out with 6 sec. to play but to avail the buzzer sounded as Guy Manning's last effort missed the mark.
